

Israel

Israel (/ˈɪzrəl, ˈɪzreɪl/; Hebrew: יִשְׂרָאֵל; Arabic: إِسْرَائِيل), formally known as the **State of Israel** (Hebrew: מְדִינַת יִשְׂרָאֵל *Medinat Yisra'el*), is a country in Western Asia, located on the southeastern shore of the Mediterranean Sea and the northern shore of the Red Sea. It has land borders with Lebanon to the north, Syria to the northeast, Jordan on the east, the Palestinian territories of the West Bank and Gaza Strip^[20] to the east and west, respectively, and Egypt to the southwest. The country contains geographically diverse features within its relatively small area.^{[21][22]} Israel's economic and technological center is Tel Aviv,^[23] while its seat of government and proclaimed capital is Jerusalem, although the state's sovereignty over Jerusalem has only partial recognition.^{[24][25][26][27][fn 4]}

Israel has evidence of the earliest migration of hominids out of Africa.^[28] Canaanite tribes are archaeologically attested since the Middle Bronze Age,^{[29][30]} while the Kingdoms of Israel and Judah emerged during the Iron Age.^{[31][32]} The Neo-Assyrian Empire destroyed Israel around 720 BCE,^[33] Judah was later conquered by the Babylonian, Persian and Hellenistic empires and had existed as Jewish autonomous provinces.^{[34][35]} The successful Maccabean Revolt led to an independent Hasmonean kingdom by 110 BCE,^[36] which in 63 BCE however became a client state of the Roman Republic that subsequently installed the Herodian dynasty in 37 BCE, and in 6 CE created the Roman province of Judea.^[37] Judea lasted as a Roman province until the failed Jewish revolts resulted in widespread destruction,^[36] the expulsion of the Jewish population^{[36][38]} and the renaming of the region from *Judaea* to *Syria Palaestina*.^[39] Jewish presence in the region has persisted to a certain extent over the centuries. In the 7th century CE, the Levant was taken from the Byzantine Empire

by the Arabs and remained in Muslim control until the First Crusade of 1099, followed by the Ayyubid conquest of 1187. The Mamluk Sultanate of Egypt extended its control over the Levant in the 13th century until its defeat by the Ottoman Empire in 1517. During the 19th century, national awakening among Jews led to the establishment of the Zionist movement in the diaspora followed by waves of immigration to Ottoman Syria and later Mandatory Palestine.

In 1947, the United Nations (UN) adopted a Partition Plan for Palestine recommending the creation of independent Arab and Jewish states and an internationalized Jerusalem.^[40] The plan was accepted by the Jewish Agency, and rejected by Arab leaders.^{[41][42][43]} The following year, the Jewish Agency declared the independence of the State of Israel, and the subsequent 1948 Arab–Israeli War saw Israel's establishment over most of the former Mandate territory, while the West Bank and Gaza were held by neighboring Arab states.^[44] Israel has since fought several wars with Arab countries,^[45] and since the Six-Day War in June 1967 held occupied territories including the West Bank, Golan Heights and the Gaza Strip (still considered occupied after the 2005 disengagement, although some legal experts dispute this claim).^{[46][47][48][fn 5]} It extended its laws to the Golan Heights and East Jerusalem, but not the West Bank.^{[49][50][51][52]} Israel's occupation of the Palestinian territories is the world's longest military occupation in modern times.^{[fn 5][54]} Efforts to resolve the Israeli–Palestinian conflict have not resulted in a final peace agreement, while Israel has signed peace treaties with both Egypt and Jordan.

In its Basic Laws, Israel defines itself as a Jewish and democratic state and the nation state of the Jewish people.^[55] The country has a liberal democracy (one of only two in the Middle East and North Africa region, the other being Tunisia),^{[56][57]} with a parliamentary system, proportional representation, and universal suffrage.^{[58][59]} The prime minister is head of government and the Knesset is the legislature.

Etymology

Under British Mandate (1920–1948), the whole region was known as Palestine (Hebrew: [פְּלֶשְׁתִּינָה א״י], lit. 'Palestine [Eretz Israel]').^[70] Upon independence in 1948, the country formally adopted the name "State of Israel" (Hebrew: מְדִינַת יִשְׂרָאֵל ‬ *Medīnat Yisrā'el* [mediˈnat jisʁaˈʔel]; Arabic: دَوْلَة إِسْرَائِيل *Dawlat Isrā'īl* [dawlat ʔisraːˈʔiːl]) after other proposed historical and religious names including *Eretz Israel* ("the Land of Israel"), Ever (from ancestor Eber), Zion, and Judea, were considered but rejected,^[71] while the name 'Israel' was suggested by Ben-Gurion and passed by a vote of 6–3.^[72] In the early weeks of independence, the government chose the term "Israeli" to denote a citizen of Israel, with the formal announcement made by Minister of Foreign Affairs Moshe Sharett.^[73]

The names Land of Israel and Children of Israel have historically been used to refer to the biblical Kingdom of Israel and the entire Jewish people respectively.^[74] The name "Israel" (Hebrew: *Yisra'el*, *Isrā'īl*; Septuagint Greek: Ἰσραῆλ *Israēl*; 'El (God) persists/rules', though after Hosea 12:4 (<https://bible.orem.us.org/?passage=Hosea+12:4-12:4&version=nrsv>) often interpreted as "struggle with God")^{[75][76][77][78]} in these phrases

The Merneptah Stele (13th century BCE). The majority of biblical archeologists translate a set of hieroglyphs as "Israel," the first instance of the name in the record.

refers to the patriarch Jacob who, according to the Hebrew Bible, was given the name after he successfully wrestled with the angel of the Lord.^[79] Jacob's twelve sons became the ancestors of the Israelites, also known as the *Twelve Tribes of Israel* or *Children of Israel*. Jacob and his sons had lived in Canaan but were forced by famine to go into Egypt for four generations, lasting 430 years,^[80] until Moses, a great-great grandson of Jacob,^[81] led the Israelites back into Canaan during the "Exodus". The earliest known archaeological artifact to mention the word "Israel" as a collective is the Merneptah Stele of ancient Egypt (dated to the late 13th century BCE).^[82]

The area is also known as the Holy Land, being holy for all Abrahamic religions including Judaism, Christianity, Islam and the Bahá'í Faith. Through the centuries, the territory was known by a variety of other names, including Canaan, Djahy, Samaria, Judea, Yehud, Iudaea, Syria Palaestina and Southern Syria.

History

Prehistory

The oldest evidence of early humans in the territory of modern Israel, dating to 1.5 million years ago, was found in Ubeidiya near the Sea of Galilee.^[83] Other notable Paleolithic sites include the caves Tabun, Qesem and Manot. The oldest fossils of anatomically modern humans found outside Africa are the Skhul and Qafzeh hominins, who lived in the area that is now northern Israel 120,000 years ago.^[84] Around 10th millennium BCE, the Natufian culture existed in the area.^[85]

Antiquity

The early history of the territory is unclear.^{[31]:104} Modern archaeology has largely discarded the historicity of the narrative in the Torah concerning the patriarchs, The Exodus, and the conquest of Canaan described in the Book of Joshua, and instead views the narrative as constituting the Israelites' national myth.^[86] During the Late Bronze Age (1550–1200 BCE), large parts of Canaan formed vassal states paying tribute to the New Kingdom of Egypt, whose administrative headquarters lay in Gaza.^[87] Ancestors of the Israelites are thought to have included ancient Semitic-speaking peoples native to this area.^{[88]:78–79} The Israelites and their culture, according to the modern archaeological account, did not overtake the region by force, but instead branched out of these Canaanite peoples and their cultures through the development of a distinct monolatristic—and later monotheistic—religion centered on Yahweh.^{[89][90][91][92][93][94]} The archaeological evidence indicates a society of village-like centres, but with more limited resources and a small population.^[95] Villages had populations of

The Large Stone Structure, archaeological site in Jerusalem

up to 300 or 400,^{[96][97]} which lived by farming and herding, and were largely self-sufficient;^[98] economic interchange was prevalent.^[99] Writing was known and available for recording, even in small sites.^[100]

While it is unclear if there was ever a United Monarchy,^{[101][31][102][103]} there is well-accepted archeological evidence referring to "Israel" in the Merneptah Stele which dates to about 1200 BCE;^{[104][105][106]} and the Canaanites are archaeologically attested in the Middle Bronze Age (2100–1550 BCE).^{[30][107]} There is debate about the earliest existence of the Kingdoms of Israel and Judah and their extent and power, but historians and archaeologists agree that a Kingdom of Israel existed by ca. 900 BCE^{[31]:169–195[102][103]} and that a Kingdom of Judah existed by ca. 700 BCE.^[32] The Kingdom of Israel was destroyed around 720 BCE, when it was conquered by the Neo-Assyrian Empire.^[33]

Map of Israel and Judah in the 9th century BCE

In 586 BCE, King Nebuchadnezzar II of Babylon conquered Judah. According to the Hebrew Bible, he destroyed Solomon's Temple and exiled the Jews to Babylon. The defeat was also recorded in the Babylonian Chronicles.^{[34][108]} The Babylonian exile ended around 538 BCE under the rule of the Medo-Persian Cyrus the Great after he captured Babylon.^{[109][110]} The Second Temple was constructed around 520 BCE.^[109] As part of the Persian Empire, the former Kingdom of Judah became the province of Judah (*Yehud Medinata*) with different borders, covering a smaller territory.^[111] The population of the province was greatly reduced from that of the kingdom, archaeological surveys showing a population of around 30,000 people in the 5th to 4th centuries BCE.^{[31]:308}

Classical period

With successive Persian rule, the autonomous province *Yehud Medinata* was gradually developing back into urban society, largely dominated by Judeans. The Greek conquests largely skipped the region without any resistance or interest. Incorporated into the Ptolemaic and finally the Seleucid empires, the southern Levant was heavily hellenized, building the tensions between Judeans and Greeks. The conflict erupted in 167 BCE with the Maccabean Revolt, which succeeded in establishing an independent Hasmonean Kingdom in Judah, which later expanded over much of modern Israel, as the Seleucids gradually lost control in the region.

The Roman Republic invaded the region in 63 BCE, first taking control of Syria, and then intervening in the Hasmonean Civil War. The struggle between pro-Roman and pro-Parthian factions in Judea eventually led to the installation of Herod the Great and consolidation of the Herodian kingdom as a vassal Judean state of Rome. With the decline of

Portion of the Temple Scroll, one of the Dead Sea Scrolls, written during the Second Temple period

the Herodian dynasty, Judea, transformed into a Roman province, became the site of a violent struggle of Jews against Romans, culminating in the Jewish–Roman wars, ending in wide-scale destruction, expulsions, genocide, and enslavement of masses of Jewish captives. An estimated 1,356,460 Jews were killed as a result of the First Jewish Revolt;^[112] the Second Jewish Revolt (115–117) led to the death of more than 200,000 Jews;^[113] and the Third Jewish Revolt (132–136) resulted in the death of 580,000 Jewish soldiers.^[114]

Jewish presence in the region significantly dwindled after the failure of the Bar Kokhba revolt against the Roman Empire in 132 CE.^[115] Nevertheless, there was a continuous small Jewish presence and Galilee became its religious center.^{[116][117]} The Mishnah and part of the Talmud, central Jewish texts, were composed during the 2nd to 4th centuries CE in Tiberias and Jerusalem.^[118] The region came to be populated predominantly by Greco-Romans on the coast and Samaritans in the hill-country. Christianity was gradually evolving over Roman Paganism, when the area stood under Byzantine rule. Through the 5th and 6th centuries, the dramatic events of the repeated Samaritan revolts reshaped the land, with massive destruction to Byzantine Christian and Samaritan societies and a resulting decrease of the population. After the Persian conquest and the installation of a short-lived Jewish Commonwealth in 614 CE, the Byzantine Empire reconquered the country in 628.

Middle Ages and modern history

In 634–641 CE, the region, including Jerusalem, was conquered by the Arabs who had recently adopted Islam. Control of the region transferred between the Rashidun Caliphs, Umayyads, Abbasids, Fatimids, Seljuks, Crusaders, and Ayyubids throughout the next three centuries.^[120]

During the siege of Jerusalem by the First Crusade in 1099, the Jewish inhabitants of the city fought side by side with the Fatimid garrison and the Muslim population who tried in vain to defend the city against the Crusaders. When the city fell, around 60,000 people were massacred, including 6,000 Jews seeking refuge in a synagogue.^[121] At this time, a full thousand years after the fall of the Jewish state, there were Jewish communities all over the country. Fifty of them are known and include Jerusalem, Tiberias, Ramleh, Ashkelon, Caesarea, and Gaza.^[122] According to Albert of Aachen, the Jewish residents of Haifa were the main fighting force of the city, and "mixed with Saracen [Fatimid] troops", they fought bravely for close to a month until forced into retreat by the Crusader fleet and land army.^{[123][124]}

Kfar Bar'am, an ancient Jewish village, abandoned some time between the 7th–13th centuries CE.^[119]

In 1165, Maimonides visited Jerusalem and prayed on the Temple Mount, in the "great, holy house."^[125] In 1141, the Spanish-Jewish poet Yehuda Halevi issued a call for Jews to migrate to the Land of Israel, a journey he undertook himself. In 1187, Sultan Saladin, founder of the Ayyubid dynasty, defeated the Crusaders in the Battle of Hattin and subsequently captured Jerusalem and almost all of Palestine. In time, Saladin issued a proclamation inviting Jews to

return and settle in Jerusalem,^[126] and according to Judah al-Harizi, they did: "From the day the Arabs took Jerusalem, the Israelites inhabited it."^[127] Al-Harizi compared Saladin's decree allowing Jews to re-establish themselves in Jerusalem to the one issued by the Persian king Cyrus the Great over 1,600 years earlier.^[128]

In 1211, the Jewish community in the country was strengthened by the arrival of a group headed by over 300 rabbis from France and England,^[129] among them Rabbi Samson ben Abraham of Sens.^[130] Nachmanides (Ramban), the 13th-century Spanish rabbi and recognised leader of Jewry, greatly praised the Land of Israel and viewed its settlement as a positive commandment incumbent on all Jews. He wrote "If the gentiles wish to make peace, we shall make peace and leave them on clear terms; but as for the land, we shall not leave it in their hands, nor in the hands of any nation, not in any generation."^[131]

The 13th-century Ramban Synagogue in Jerusalem

In 1260, control passed to the Mamluk sultans of Egypt.^[132] The country was located between the two centres of Mamluk power, Cairo and Damascus, and only saw some development along the postal road connecting the two cities. Jerusalem, although left without the protection of any city walls since 1219, also saw a flurry of new construction projects centred around the Al-Aqsa Mosque compound on the Temple Mount. In 1266, the Mamluk Sultan Baybars converted the Cave of the Patriarchs in Hebron into an exclusive Islamic sanctuary and banned Christians and Jews from entering, who previously had been able to enter it for a fee. The ban remained in place until Israel took control of the building in 1967.^{[133][134]}

In 1470, Isaac b. Meir Latif arrived from Italy and counted 150 Jewish families in Jerusalem.^[135] Thanks to Joseph Saragossi who had arrived in the closing years of the 15th century, Safed and its environs had developed into the largest concentration of Jews in Palestine. With the help of the Sephardic immigration from Spain, the Jewish population had increased to 10,000 by the early 16th century.^[136]

Jews at the Western Wall, 1870s

In 1516, the region was conquered by the Ottoman Empire; it remained under Turkish rule until the end of the First World War, when Britain defeated the Ottoman forces and set up a military administration across the former Ottoman Syria. In 1660, a Druze revolt led to the destruction of Safed and Tiberias.^[137] In the late 18th century, local Arab Sheikh Zahir al-Umar created a de facto independent Emirate in the Galilee. Ottoman attempts to subdue the Sheikh failed, but after Zahir's death the Ottomans regained control of the area. In 1799 governor Jazzar Pasha successfully repelled an assault on Acre by troops of Napoleon, prompting the French to abandon the Syrian campaign.^[138] In 1834 a revolt by Palestinian Arab peasants broke out against Egyptian conscription and taxation policies under Muhammad Ali. Although the revolt was suppressed, Muhammad Ali's army

retreated and Ottoman rule was restored with British support in 1840.^[139] Shortly after, the Tanzimat reforms were implemented across the Ottoman Empire. In 1920, after the Allies conquered the Levant during World War I, the territory was divided between Britain and France under the mandate system, and the British-administered area which included modern day Israel was named Mandatory Palestine.^{[132][140][141]}

Zionism and British Mandate

Since the existence of the earliest Jewish diaspora, many Jews have aspired to return to "Zion" and the "Land of Israel",^[142] though the amount of effort that should be spent towards such an aim was a matter of dispute.^{[143][144]} The hopes and yearnings of Jews living in exile are an important theme of the Jewish belief system.^[143] After the Jews were expelled from Spain in 1492, some communities settled in Palestine.^[145] During the 16th century, Jewish communities struck roots in the Four Holy Cities—Jerusalem, Tiberias, Hebron, and Safed—and in 1697, Rabbi Yehuda Hachasid led a group of 1,500 Jews to Jerusalem.^[146] In the second half of the 18th century, Eastern European opponents of Hasidism, known as the Perushim, settled in Palestine.^{[147][148][149]}

Theodor Herzl, visionary of the Jewish state

"Therefore I believe that a wonderous generation of Jews will spring into existence. The Maccabaeans will rise again. Let me repeat once more my opening words: The Jews wish to have a State, and they shall have one. We shall live at last as free men on our own soil, and die peacefully in our own home. The world will be freed by our liberty, enriched by our wealth, magnified by our greatness. And whatever we attempt there to accomplish for our own welfare will react with beneficent force for the good of humanity."

Theodor Herzl (1896). *A Jewish State* ([https://en.wikisource.org/wiki/A_Jewish_State_\(1917_translation\)/Conclusion](https://en.wikisource.org/wiki/A_Jewish_State_(1917_translation)/Conclusion)) – via Wikisource.
[scan 

The first wave of modern Jewish migration to Ottoman-ruled Palestine, known as the First Aliyah, began in 1881, as Jews fled pogroms in Eastern Europe.^[150] The First Aliyah laid the cornerstone for widespread Jewish settlement in Palestine. From 1881 to 1903, the Jews had established dozens of settlements and purchased about 350,000 dunams of land. At the same time, the revival of the Hebrew language began among Jews in Palestine, spurred on largely by Eliezer Ben-Yehuda, a Russian-born Jew who had settled in Jerusalem in 1881. Jews were encouraged to speak Hebrew in the place of other languages, a Hebrew school system began to emerge, and new words were coined or borrowed from other languages for modern inventions and concepts. As a result, Hebrew gradually became the predominant language of the Jewish community of Palestine, which had been divided into different linguistic communities which primarily used Hebrew for religious purposes and as a means of communication between Jews with different native languages.

Although the Zionist movement already existed in practice, Austro-Hungarian journalist Theodor Herzl is credited with founding political Zionism,^[151] a movement that sought to establish a Jewish state in the Land of Israel, thus offering a solution to the so-called Jewish question of the European states, in conformity with the goals and achievements of other national projects of the time.^[152] In 1896, Herzl published *Der Judenstaat* (*The Jewish State*), offering his vision of a future Jewish state; the following year he presided over the First Zionist Congress.^[153] The Second Aliyah (1904–14), began after the Kishinev pogrom; some 40,000 Jews settled in Palestine, although nearly half of them left eventually.^[150] Both the first and second waves of migrants were mainly Orthodox Jews,^[154] although the Second Aliyah included socialist groups who established the *kibbutz* movement.^[155] Though the immigrants of the Second Aliyah largely sought to create communal agricultural settlements, the period also saw the establishment of Tel Aviv in 1909 as the "first Hebrew city." This period also saw the appearance of Jewish armed self-defense organizations as a means of defense for Jewish settlements. The first such organization was Bar-Giora, a small secret guard founded in 1907. Two years later, larger Hashomer organization was founded as it's replacement. During World War I, British Foreign Secretary Arthur Balfour sent the Balfour Declaration to Baron Rothschild (Walter Rothschild, 2nd Baron Rothschild), a leader of the British Jewish community, that stated that Britain intended for the creation of a Jewish "national home" in Palestine.^{[156][157]}

In 1918, the Jewish Legion, a group primarily of Zionist volunteers, assisted in the British conquest of Palestine.^[158] Arab opposition to British rule and Jewish immigration led to the 1920 Palestine riots and the formation of a Jewish militia known as the Haganah (meaning "The Defense" in Hebrew) in 1920 as an outgrowth of Hashomer, from which the Irgun and Lehi, or the Stern Gang, paramilitary groups later split off.^[159] In 1922, the League of Nations granted Britain the Mandate for Palestine under terms which included the Balfour Declaration with its promise to the Jews, and with similar provisions regarding the Arab Palestinians.^[160] The population of the area at this time was predominantly Arab and Muslim, with Jews accounting for about 11%,^[161] and Arab Christians about 9.5% of the population.^[162]

The Third (1919–23) and Fourth Aliyahs (1924–29) brought an additional 100,000 Jews to Palestine.^[150] The rise of Nazism and the increasing persecution of Jews in 1930s Europe led to the Fifth Aliyah, with an influx of a quarter of a million Jews. This was a major cause of the Arab revolt of 1936–39, which was launched as a reaction to continued Jewish immigration and land purchases. Several hundred Jews and British security personnel were killed, while the British Mandate authorities alongside the Zionist militias of the Haganah and Irgun killed 5,032 Arabs and wounded 14,760,^{[163][164]} resulting in over ten percent of the adult male Palestinian Arab population killed, wounded, imprisoned or exiled.^[165] The British introduced restrictions on Jewish immigration to Palestine with the White Paper of 1939. With countries around the world turning away Jewish refugees fleeing the Holocaust, a clandestine movement known as Aliyah Bet was organized to bring Jews to Palestine.^[150] By the end of World War II, the Jewish population of Palestine had increased to 33% of the total population.^[166]

After World War II

After World War II, the UK found itself facing a Jewish guerrilla campaign over Jewish immigration limits, as well as continued conflict with the Arab community over limit levels. The Haganah joined Irgun and Lehi in an armed struggle against British rule.^[167] At the same time, hundreds of thousands of Jewish Holocaust survivors and refugees sought a new life far from their destroyed communities in Europe. The Haganah attempted to bring these refugees to Palestine in a program called Aliyah Bet in which tens of thousands of Jewish refugees attempted enter Palestine by ship. Most of the ships were intercepted by the Royal Navy and the refugees rounded up and placed in detention camps in Atlit and Cyprus by the British.^{[168][169]}

On 22 July 1946, Irgun attacked the British administrative headquarters for Palestine, which was housed in the southern wing^[170] of the King David Hotel in Jerusalem.^{[171][172][173]} A total of 91 people of various nationalities were killed and 46 were injured.^[174] The hotel was the site of the Secretariat of the Government of Palestine and the Headquarters of the British Armed Forces in Mandatory Palestine and Transjordan.^{[174][175]} The attack initially had the approval of the Haganah. It was conceived as a response to Operation Agatha (a series of widespread raids, including one on the Jewish Agency, conducted by the British authorities) and was the deadliest directed at the British during the Mandate era.^{[174][175]} It was characterized as one of the "most lethal terrorist incidents of the twentieth century."^[176] The Jewish insurgency continued throughout the rest of 1946 and 1947 despite repressive efforts by the British military and Palestine Police Force to stop it. British efforts to mediate a negotiated solution with Jewish and Arab representatives also failed as the Jews were unwilling to accept any solution that did not involve a Jewish state and suggested a partition of Palestine into Jewish and Arab states, while the Arabs were adamant that a Jewish state in any part of Palestine was unacceptable and that the only solution was a unified Palestine under Arab rule. In February 1947, the British referred the Palestine issue to the newly formed United Nations. On 15 May 1947, the General Assembly of the United Nations resolved that the United Nations Special Committee on Palestine be created "to prepare for consideration at the next regular session of the Assembly a report on the question of Palestine."^[177] In the Report of the Committee dated 3 September 1947 to the General Assembly,^[178] the majority of the Committee in Chapter VI proposed a plan to replace the British Mandate with "an independent Arab State, an independent Jewish State, and the City of Jerusalem [...] the last to be under an International Trusteeship System."^[179] Meanwhile, the Jewish insurgency continued and peaked in July 1947, with a series of widespread guerrilla raids culminating in the sergeants affair. After three Irgun fighters had been sentenced to death for their role in the Acre Prison break, a May 1947 Irgun raid on Acre

UN Map, *Palestine plan of partition with economic union*

David Ben-Gurion proclaiming the Israeli Declaration of Independence on 14 May 1948

Prison in which 27 Irgun and Lehi militants were freed, the Irgun captured two British sergeants and held them hostage, threatening to kill them if the three men were executed. When the British carried out the executions, the Irgun responded by killing the two hostages and hanged their bodies from eucalyptus trees, booby-trapping one of them with a mine which injured a British officer as he cut the body down. The hangings caused widespread outrage in Britain and were a major factor in the consensus forming in Britain that it was time to evacuate Palestine.

In September 1947, the British cabinet decided that the Mandate was no longer tenable, and to evacuate Palestine. According to Colonial Secretary Arthur Creech Jones, four major factors led to the decision to evacuate Palestine: the inflexibility of Jewish and Arab negotiators who were unwilling to compromise on their core positions over the question of a Jewish state in Palestine, the economic pressure that stationing a large garrison in Palestine to deal with the Jewish insurgency and the possibility of a wider Jewish rebellion and the possibility of an Arab rebellion put on a British economy already strained by World War II, the "deadly blow to British patience and pride" caused by the hangings of the sergeants, and the mounting criticism the government faced in failing to find a new policy for Palestine in place of the White Paper of 1939.^[180]

On 29 November 1947, the General Assembly adopted Resolution 181 (II) recommending the adoption and implementation of the *Plan of Partition with Economic Union*.^[40] The plan attached to the resolution was essentially that proposed by the majority of the Committee in the report of 3 September. The Jewish Agency, which was the recognized representative of the Jewish community, accepted the plan.^{[42][43]} The Arab League and Arab Higher Committee of Palestine rejected it, and indicated that they would reject any other plan of partition.^{[41][181]} On the following day, 1 December 1947, the Arab Higher Committee proclaimed a three-day strike, and riots broke out in Jerusalem.^[182] The situation spiralled into a civil war; just two weeks after the UN vote, Colonial Secretary Arthur Creech Jones announced that the British Mandate would end on 15 May 1948, at which point the British would evacuate. As Arab militias and gangs attacked Jewish areas, they were faced mainly by the Haganah, as well as the smaller Irgun and Lehi. In April 1948, the Haganah moved onto the offensive.^{[183][184]} During this period 250,000 Palestinian Arabs fled or were expelled, due to a number of factors.^[185]

On 14 May 1948, the day before the expiration of the British Mandate, David Ben-Gurion, the head of the Jewish Agency, declared "the establishment of a Jewish state in Eretz-Israel, to be known as the State of Israel."^{[44][186]} The only reference in the text of the Declaration to the borders of the new state is the use of the term *Eretz-Israel* ("Land of Israel").^[187] The following day, the armies of four Arab countries—Egypt, Syria, Transjordan and Iraq—entered what had been British Mandatory Palestine, launching the 1948 Arab–Israeli War;^{[188][189]} contingents from Yemen, Morocco, Saudi Arabia and Sudan joined the war.^{[190][191]} The apparent purpose of the invasion was to prevent the establishment of the Jewish state at inception, and some Arab

Raising of the Ink Flag, marking the end of the 1948 Arab–Israeli War

leaders talked about driving the Jews into the sea.^{[192][43][193]} According to Benny Morris, Jews felt that the invading Arab armies aimed to slaughter the Jews.^[194] The Arab league stated that the invasion was to restore law and order and to prevent further bloodshed.^[195]

After a year of fighting, a ceasefire was declared and temporary borders, known as the Green Line, were established.^[196] Jordan annexed what became known as the West Bank, including East Jerusalem, and Egypt occupied the Gaza Strip. The UN estimated that more than 700,000 Palestinians were expelled by or fled from advancing Israeli forces during the conflict—what would become known in Arabic as the *Nakba* ("catastrophe").^[197] Some 156,000 remained and became Arab citizens of Israel.^[198]

Early years of the State of Israel

Israel was admitted as a member of the UN by majority vote on 11 May 1949.^[199] Both Israel and Jordan were genuinely interested in a peace agreement but the British acted as a brake on the Jordanian effort in order to avoid damaging British interests in Egypt.^[200] In the early years of the state, the Labor Zionist movement led by Prime Minister David Ben-Gurion dominated Israeli politics.^{[201][202]} The kibbutzim, or collective farming communities, played a pivotal role in establishing the new state.^[203]

Immigration to Israel during the late 1940s and early 1950s was aided by the Israeli Immigration Department and the non-government sponsored Mossad LeAliyah Bet (lit. "Institute for Immigration B") which organized illegal and clandestine immigration.^[204] Both groups facilitated regular immigration logistics like arranging transportation, but the latter also engaged in clandestine operations in countries, particularly in the Middle East and Eastern Europe, where the lives of Jews were believed to be in danger and exit from those places was difficult. Mossad LeAliyah Bet was disbanded in 1953.^[205] The immigration was in accordance with the One Million Plan. The immigrants came for differing reasons: some held Zionist beliefs or came for the promise of a better life in Israel, while others moved to escape persecution or were expelled.^{[206][207]}

An influx of Holocaust survivors and Jews from Arab and Muslim countries to Israel during the first three years increased the number of Jews from 700,000 to 1,400,000. By 1958, the population of Israel rose to two million.^[208] Between 1948 and 1970, approximately 1,150,000 Jewish refugees relocated to Israel.^[209] Some new immigrants arrived as refugees with no possessions and were housed in temporary camps known as *ma'abarot*; by 1952, over 200,000 people were living in these tent cities.^[210] Jews of European background were often treated more favorably than Jews from Middle Eastern and North African countries—housing units reserved for the latter were often re-designated for the former, with the result that Jews newly arrived from Arab lands generally ended up staying in transit camps for longer.^[211] Tensions that developed between the two groups over such discrimination persist to the present day.^[212] During this period, food, clothes and furniture had to be rationed in what became known as the austerity period. The need to solve the crisis led Ben-Gurion to sign a reparations agreement with West Germany that triggered mass protests by Jews angered at the idea that Israel could accept monetary compensation for the Holocaust.^[213]

During the 1950s, Israel was frequently attacked by Palestinian fedayeen, nearly always against civilians,^[214] mainly from the Egyptian-occupied Gaza Strip,^[215] leading to several Israeli counter-raids. In 1956, the United Kingdom and France aimed at regaining control of the Suez Canal, which the Egyptians had nationalized. The continued blockade of the Suez Canal and Straits of Tiran to Israeli shipping, together with the growing amount of Fedayeen attacks against Israel's southern population, and recent Arab grave and threatening statements, prompted Israel to attack Egypt.^{[216][217][218][219]} Israel joined a secret alliance with the United Kingdom and France and overran the Sinai Peninsula but was pressured to withdraw by the UN in return for guarantees of Israeli shipping rights in the Red Sea via the Straits of Tiran and the Canal.^{[220][221][222]} The war, known as the Suez Crisis, resulted in significant reduction of Israeli border infiltration.^{[223][224][225][226]} In the early 1960s, Israel captured Nazi war criminal Adolf Eichmann in Argentina and brought him to Israel for trial.^[227] The trial had a major impact on public awareness of the Holocaust.^[228] Eichmann remains the only person executed in Israel by conviction in an Israeli civilian court.^[229] During the spring and summer of 1963 Israel was engaged in a, now declassified diplomatic standoff with the United States due to the Israeli nuclear program.^{[230][231]}

U.S. newsreel on the trial of Adolf Eichmann

Since 1964, Arab countries, concerned over Israeli plans to divert waters of the Jordan River into the coastal plain,^[232] had been trying to divert the headwaters to deprive Israel of water resources, provoking tensions between Israel on the one hand, and Syria and Lebanon on the other. Arab nationalists led by Egyptian President Gamal Abdel Nasser refused to recognize Israel, and called for its destruction.^{[45][233][234]} By 1966, Israeli-Arab relations had deteriorated to the point of actual battles taking place between Israeli and Arab forces.^[235] In May 1967, Egypt massed its army near the border with Israel, expelled UN peacekeepers, stationed in the Sinai Peninsula since 1957, and blocked Israel's access to the Red Sea.^{[236][237][238]} Other Arab states mobilized their forces.^[239] Israel reiterated that these actions were a *casus belli* and, on 5 June, launched a pre-emptive strike against Egypt. Jordan, Syria and Iraq responded and attacked Israel. In a Six-Day War, Israel defeated Jordan and captured the West Bank, defeated Egypt and captured the Gaza Strip and Sinai Peninsula, and defeated Syria and captured the Golan Heights.^[240] Jerusalem's boundaries were enlarged, incorporating East Jerusalem, and the 1949 Green Line became the administrative boundary between Israel and the occupied territories.

Territory held by Israel:

- before the Six-Day War
- after the war

The Sinai Peninsula was returned to Egypt in 1982.

Following the 1967 war and the "Three No's" resolution of the Arab League and during the 1967–1970 War of Attrition, Israel faced attacks from the Egyptians in the Sinai Peninsula, and from Palestinian groups targeting Israelis in the occupied territories, in Israel proper, and

around the world. Most important among the various Palestinian and Arab groups was the Palestinian Liberation Organization (PLO), established in 1964, which initially committed itself to "armed struggle as the only way to liberate the homeland".^{[241][242]} In the late 1960s and early 1970s, Palestinian groups launched a wave of attacks^{[243][244]} against Israeli and Jewish targets around the world,^[245] including a massacre of Israeli athletes at the 1972 Summer Olympics in Munich. The Israeli government responded with an assassination campaign against the organizers of the massacre, a bombing and a raid on the PLO headquarters in Lebanon.

On 6 October 1973, as Jews were observing Yom Kippur, the Egyptian and Syrian armies launched a surprise attack against Israeli forces in the Sinai Peninsula and Golan Heights, that opened the Yom Kippur War. The war ended on 25 October with Israel successfully repelling Egyptian and Syrian forces but having suffered over 2,500 soldiers killed in a war which collectively took 10–35,000 lives in about 20 days.^[246] An internal inquiry exonerated the government of responsibility for failures before and during the war, but public anger forced Prime Minister Golda Meir to resign.^[247] In July 1976, an airliner was hijacked during its flight from Israel to France by Palestinian guerrillas and landed at Entebbe, Uganda. Israeli commandos carried out an operation in which 102 out of 106 Israeli hostages were successfully rescued.

Further conflict and peace process

The 1977 Knesset elections marked a major turning point in Israeli political history as Menachem Begin's Likud party took control from the Labor Party.^[248] Later that year, Egyptian President Anwar El Sadat made a trip to Israel and spoke before the Knesset in what was the first recognition of Israel by an Arab head of state.^[249] In the two years that followed, Sadat and Begin signed the Camp David Accords (1978) and the Israel–Egypt Peace Treaty (1979).^[250] In return, Israel withdrew from the Sinai Peninsula and agreed to enter negotiations over an autonomy for Palestinians in the West Bank and the Gaza Strip.^[251]

On 11 March 1978, a PLO guerilla raid from Lebanon led to the Coastal Road massacre. Israel responded by launching an invasion of southern Lebanon to destroy the PLO bases south of the Litani River. Most PLO fighters withdrew, but Israel was able to secure southern Lebanon until a UN force and the Lebanese army could take over. The PLO soon resumed its policy of attacks against Israel. In the next few years, the PLO infiltrated the south and kept up a sporadic shelling across the border. Israel carried out numerous retaliatory attacks by air and on the ground.

Meanwhile, Begin's government provided incentives for Israelis to settle in the occupied West Bank, increasing friction with the Palestinians in that area.^[253] The Basic Law: Jerusalem, Capital of Israel, passed in 1980, was believed by some to reaffirm Israel's 1967 annexation of Jerusalem by government decree, and reignited international controversy over the status of the city. No Israeli legislation has defined the territory of Israel and no act specifically included East Jerusalem therein.^[254] The position of the majority of UN member states is reflected in numerous resolutions declaring that actions taken by Israel to settle its citizens in the West Bank, and impose its laws and administration on East Jerusalem, are illegal and have no validity.^[255] In 1981 Israel annexed the Golan Heights, although annexation was not recognized

internationally.^[256] Israel's population diversity expanded in the 1980s and 1990s. Several waves of Ethiopian Jews immigrated to Israel since the 1980s, while between 1990 and 1994, immigration from the post-Soviet states increased Israel's population by twelve percent.^[257]

On 7 June 1981, the Israeli air force destroyed Iraq's sole nuclear reactor under construction just outside Baghdad, in order to impede Iraq's nuclear weapons program. Following a series of PLO attacks in 1982, Israel invaded Lebanon that year to destroy the bases from which the PLO launched attacks and missiles into northern Israel.^[258] In the first six days of fighting, the Israelis destroyed the military forces of the PLO in Lebanon and decisively defeated the Syrians. An Israeli government inquiry—the Kahan Commission—would later hold Begin and several Israeli generals as indirectly responsible for the Sabra and Shatila massacre and hold Defense minister Ariel Sharon as bearing "personal responsibility" for the massacre.^[259] Sharon was forced to resign as Defense Minister.^[260] In 1985, Israel responded to a Palestinian terrorist attack in Cyprus by bombing the PLO headquarters in Tunisia. Israel withdrew from most of Lebanon in 1986, but maintained a borderland buffer zone in southern Lebanon until 2000, from where Israeli forces engaged in conflict with Hezbollah. The First Intifada, a Palestinian uprising against Israeli rule,^[261] broke out in 1987, with waves of uncoordinated demonstrations and violence occurring in the occupied West Bank and Gaza. Over the following six years, the Intifada became more organised and included economic and cultural measures aimed at disrupting the Israeli occupation. More than a thousand people were killed in the violence.^[262] During the 1991 Gulf War, the PLO supported Saddam Hussein and Iraqi Scud missile attacks against Israel. Despite public outrage, Israel heeded American calls to refrain from hitting back and did not participate in that war.^{[263][264]}

In 1992, Yitzhak Rabin became Prime Minister following an election in which his party called for compromise with Israel's neighbors.^{[265][266]} The following year, Shimon Peres on behalf of Israel, and Mahmoud Abbas for the PLO, signed the Oslo Accords, which gave the Palestinian National Authority the right to govern parts of the West Bank and the Gaza Strip.^[267] The PLO also recognized Israel's right to exist and pledged an end to terrorism.^[268] In 1994, the Israel–Jordan peace treaty was signed, making Jordan the second Arab country to normalize relations with Israel.^[269] Arab public support for the Accords was damaged by the continuation of Israeli settlements^[270] and checkpoints, and the deterioration of economic conditions.^[271] Israeli public support for the Accords waned as Israel was struck by Palestinian suicide attacks.^[272] In November 1995, while leaving a peace rally, Yitzhak Rabin was assassinated by Yigal Amir, a far-right-wing Jew who opposed the Accords.^[273]

Israel's 1980 law declared that "Jerusalem, complete and united, is the capital of Israel."^[252]

Shimon Peres (left) with Yitzhak Rabin (center) and King Hussein of Jordan (right), prior to signing the Israel–Jordan peace treaty in 1994.

Under the leadership of Benjamin Netanyahu at the end of the 1990s, Israel withdrew from Hebron,^[274] and signed the Wye River Memorandum, giving greater control to the Palestinian National Authority.^[275] Ehud Barak, elected Prime Minister in 1999, began the new millennium by withdrawing forces from Southern Lebanon and conducting negotiations with Palestinian Authority Chairman Yasser Arafat and U.S. President Bill Clinton at the 2000 Camp David Summit. During the summit, Barak offered a plan for the establishment of a Palestinian state. The proposed state included the entirety of the Gaza Strip and over 90% of the West Bank with Jerusalem as a shared capital.^[276] Each side blamed the other for the failure of the talks. After a controversial visit by Likud leader Ariel Sharon to the Temple Mount, the Second Intifada began. Some commentators contend that the uprising was pre-planned by Arafat due to the collapse of peace talks.^{[277][278][279][280]} Sharon became prime minister in a 2001 special election. During his tenure, Sharon carried out his plan to unilaterally withdraw from the Gaza Strip and also spearheaded the construction of the Israeli West Bank barrier,^[281] ending the Intifada.^{[282][283]} By this time 1,100 Israelis had been killed, mostly in suicide bombings.^[284] The Palestinian fatalities, from 2000 to 2008, reached 4,791 killed by Israeli security forces, 44 killed by Israeli civilians, and 609 killed by Palestinians.^[285]

The site of the 2001 Tel Aviv Dolphinarium discotheque massacre, in which 21 Israelis were killed.

In July 2006, a Hezbollah artillery assault on Israel's northern border communities and a cross-border abduction of two Israeli soldiers precipitated the month-long Second Lebanon War.^{[286][287]} On 6 September 2007, the Israeli Air Force destroyed a nuclear reactor in Syria. At the end of 2008, Israel entered another conflict as a ceasefire between Hamas and Israel collapsed. The 2008–09 Gaza War lasted three weeks and ended after Israel announced a unilateral ceasefire.^{[288][289]} Hamas announced its own ceasefire, with its own conditions of complete withdrawal and opening of border crossings. Despite neither the rocket launchings nor Israeli retaliatory strikes having completely stopped, the fragile ceasefire remained in order.^[290] In what Israel described as a response to more than a hundred Palestinian rocket attacks on southern Israeli cities,^[291] Israel began an operation in Gaza on 14 November 2012, lasting eight days.^[292] Israel started another operation in Gaza following an escalation of rocket attacks by Hamas in July 2014.^[293]

In September 2010, Israel was invited to join the OECD.^[61] Israel has also signed free trade agreements with the European Union, the United States, the European Free Trade Association, Turkey, Mexico, Canada, Jordan, and Egypt, and in 2007, it became the first non-Latin-American country to sign a free trade agreement with the Mercosur trade bloc.^{[294][295]} By the 2010s, the increasing regional cooperation between Israel and Arab League countries, with many of whom peace agreements (Jordan, Egypt) diplomatic relations (UAE, Palestine) and unofficial relations (Bahrain, Saudi Arabia, Morocco, Tunisia), have been established, the Israeli security situation shifted from the traditional Arab–Israeli hostility towards regional rivalry with Iran and its proxies. The Iranian–Israeli conflict gradually emerged from the declared hostility of post-revolutionary Islamic Republic of Iran towards Israel since 1979, into covert Iranian support of Hezbollah during the South Lebanon conflict (1985–2000) and essentially

developed into a proxy regional conflict from 2005. With increasing Iranian involvement in the Syrian Civil War from 2011 the conflict shifted from proxy warfare into direct confrontation by early 2018.

Geography and environment

Israel is located in the Levant area of the Fertile Crescent region. The country is at the eastern end of the Mediterranean Sea, bounded by Lebanon to the north, Syria to the northeast, Jordan and the West Bank to the east, and Egypt and the Gaza Strip to the southwest. It lies between latitudes 29° and 34° N, and longitudes 34° and 36° E.

The sovereign territory of Israel (according to the demarcation lines of the 1949 Armistice Agreements and excluding all territories captured by Israel during the 1967 Six-Day War) is approximately 20,770 square kilometers (8,019 sq mi) in area, of which two percent is water.^[21] However Israel is so narrow (100 km at its widest, compared to 400 km from north to south) that the exclusive economic zone in the Mediterranean is double the land area of the country.^[296] The total area under Israeli law, including East Jerusalem and the Golan Heights, is 22,072 square kilometers (8,522 sq mi),^[297] and the total area under Israeli control, including the military-controlled and partially Palestinian-governed territory of the West Bank, is 27,799 square kilometers (10,733 sq mi).^[298]

Despite its small size, Israel is home to a variety of geographic features, from the Negev desert in the south to the inland fertile Jezreel Valley, mountain ranges of the Galilee, Carmel and toward the Golan in the north. The

Israeli coastal plain on the shores of the Mediterranean is home to most of the nation's population.^[299] East of the central highlands lies the Jordan Rift Valley, which forms a small part of the 6,500-kilometer (4,039 mi) Great Rift Valley. The Jordan River runs along the Jordan Rift Valley, from Mount Hermon through the Hulah Valley and the Sea of Galilee to the

Satellite images of Israel and neighboring territories during the day (left) and night (right)

Dead Sea, the lowest point on the surface of the Earth.^[300] Further south is the Arabah, ending with the Gulf of Eilat, part of the Red Sea. Unique to Israel and the Sinai Peninsula are makhteshim, or erosion cirques.^[301] The largest makhtesh in the world is Ramon Crater in the Negev,^[302] which measures 40 by 8 kilometers (25 by 5 mi).^[303] A report on the environmental status of the Mediterranean Basin states that Israel has the largest number of plant species per square meter of all the countries in the basin.^[304]

Tectonics and seismicity

The Jordan Rift Valley is the result of tectonic movements within the Dead Sea Transform (DSF) fault system. The DSF forms the transform boundary between the African Plate to the west and the Arabian Plate to the east. The Golan Heights and all of Jordan are part of the Arabian Plate, while the Galilee, West Bank, Coastal Plain, and Negev along with the Sinai Peninsula are on the African Plate. This tectonic disposition leads to a relatively high seismic activity in the region. The entire Jordan Valley segment is thought to have ruptured repeatedly, for instance during the last two major earthquakes along this structure in 749 and 1033. The deficit in slip that has built up since the 1033 event is sufficient to cause an earthquake of $M_w \sim 7.4$.^[305]

The most catastrophic known earthquakes occurred in 31 BCE, 363, 749, and 1033 CE, that is every ca. 400 years on average.^[306] Destructive earthquakes leading to serious loss of life strike about every 80 years.^[307] While stringent construction regulations are currently in place and recently built structures are earthquake-safe, as of 2007 the majority of the buildings in Israel were older than these regulations and many public buildings as well as 50,000 residential buildings did not meet the new standards and were "expected to collapse" if exposed to a strong earthquake.^[307]

Climate

Temperatures in Israel vary widely, especially during the winter. Coastal areas, such as those of Tel Aviv and Haifa, have a typical Mediterranean climate with cool, rainy winters and long, hot summers. The area of Beersheba and the Northern Negev have a semi-arid climate with hot summers, cool winters, and fewer rainy days than the Mediterranean climate. The Southern Negev and the Arava areas have a desert climate with very hot, dry summers, and mild winters with few days of rain. The highest temperature in the continent of Asia (54.0 °C or 129.2 °F) was recorded in 1942 at Tirat Zvi kibbutz in the northern Jordan River valley.^{[308][309]}

At the other extreme, mountainous regions can be windy and cold, and areas at elevation of 750 metres (2,460 ft) or more (same elevation as Jerusalem) will

Köppen climate classification map of Israel

usually receive at least one snowfall each year.^[310] From May to September, rain in Israel is rare.^{[311][312]} With scarce water resources, Israel has developed various water-saving technologies, including drip irrigation.^[313] Israelis also take advantage of the considerable sunlight available for solar energy, making Israel the leading nation in solar energy use per capita (practically every house uses solar panels for water heating).^[314]

Four different phytogeographic regions exist in Israel, due to the country's location between the temperate and tropical zones, bordering the Mediterranean Sea in the west and the desert in the east. For this reason, the flora and fauna of Israel are extremely diverse. There are 2,867 known species of plants found in Israel. Of these, at least 253 species are introduced and non-native.^[315] There are 380 Israeli nature reserves.^[316]

Demographics

As of 2020, Israel's population was an estimated 9,198,950, of whom 74.2% were recorded by the civil government as Jews.^[12] Arabs comprised 20.9% of the population, while non-Arab Christians and people who have no religion listed in the civil registry made up 4.8%.^[12] Over the last decade, large numbers of migrant workers from Romania, Thailand, China, Africa, and South America have settled in Israel. Exact figures are unknown, as many of them are living in the country illegally,^[317] but estimates run from 166,000^[12] to 203,000.^[318] By June 2012,

approximately 60,000 African migrants had entered Israel.^[319] About 92% of Israelis live in urban areas.^[320] Data published by the OECD in 2016 estimated the average life expectancy of Israelis at 82.5 years, making it the 6th-highest in the world.^[67]

Israel was established as a homeland for the Jewish people and is often referred to as a Jewish state. The country's Law of Return grants all Jews and those of Jewish ancestry the right to Israeli citizenship.^[321] Retention of Israel's population since 1948 is about even or greater, when compared to other countries with mass immigration.^[322] Jewish emigration from Israel (called *yerida* in Hebrew), primarily to the United States and Canada, is described by demographers as modest,^[323] but is often cited by Israeli government ministries as a major threat to Israel's future.^{[324][325]}

Three quarters of the population are Jews from a diversity of Jewish backgrounds. Approximately 75% of Israeli Jews are born in Israel,^[12] 16% are immigrants from Europe and the Americas, and 7% are immigrants from Asia and Africa (including the Arab world).^[326] Jews from Europe and the former Soviet Union and their descendants born in Israel, including Ashkenazi Jews, constitute approximately 50% of Jewish Israelis. Jews who left or fled Arab and Muslim countries and their descendants, including both Mizrahi and Sephardi Jews,^[327] form most of the rest of the Jewish population.^{[328][329][330]} Jewish intermarriage rates run at over 35% and recent studies suggest that the percentage of Israelis descended from both Sephardi and Ashkenazi Jews increases by 0.5 percent every year, with over 25% of school children now originating from both communities.^[331] Around 4% of Israelis (300,000), ethnically defined as "others", are Russian descendants of Jewish origin or family who are not Jewish according to rabbinical law, but were eligible for Israeli citizenship under the Law of Return.^{[332][333][334]}

Population pyramid of Israel

Immigration to Israel in the years 1948–2015. The two peaks were in 1949 and 1990.

The total number of Israeli settlers beyond the Green Line is over 600,000 ($\approx 10\%$ of the Jewish Israeli population).^[335] In 2016, 399,300 Israelis lived in West Bank settlements,^[336] including those that predated the establishment of the State of Israel and which were re-established after the Six-Day War, in cities such as Hebron and Gush Etzion bloc. In addition to the West Bank settlements, there were more than 200,000 Jews living in East Jerusalem,^[337] and 22,000 in the Golan Heights.^{[336][338]} Approximately 7,800 Israelis lived in settlements in the Gaza Strip, known as Gush Katif, until they were evacuated by the government as part of its 2005 disengagement plan.^[339]

Major urban areas

View over Tel Aviv Metropolitan Area

There are four major metropolitan areas: Gush Dan (Tel Aviv metropolitan area; population 3,854,000), Jerusalem metropolitan area (population 1,253,900), Haifa metropolitan area (population 924,400), and Beersheba metropolitan area (population 377,100).^[340]

Israel's largest municipality, in population and area, is Jerusalem with 919,438 residents in an area of 125 square kilometres (48 sq mi).^[341] Israeli government statistics on Jerusalem include the population and area of East Jerusalem, which is widely recognized as part of the Palestinian territories under Israeli occupation.^[342] Tel Aviv and Haifa rank as Israel's next most populous cities, with populations of 451,523 and 283,640, respectively.^[341]

Israel has 16 cities with populations over 100,000. In all, there are 77 Israeli localities granted "municipalities" (or "city") status by the Ministry of the Interior,^[343] four of which are in the West Bank.^[344] Two more cities are planned: Kasif, a planned city to be built in the Negev, and Harish, originally a small town that is being built into a large city since 2015.^[345]

[^]**a** This number includes East Jerusalem and West Bank areas, which had a total population of 542,410 inhabitants in 2016.^[346] Israeli sovereignty over East Jerusalem is internationally unrecognized.

Language

Israel has one official language, Hebrew. Arabic had been an official language of the State of Israel;^[8] in 2018 it was downgraded to having a 'special status in the state' with its use by state institutions to be set in law.^{[9][10][11]} Hebrew is the primary language of the state and is spoken every day by the majority of the population. Arabic is spoken by the Arab minority, with Hebrew taught in Arab schools.

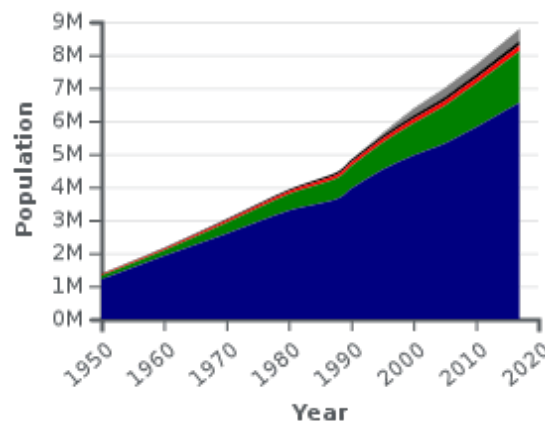

As a country of immigrants, many languages can be heard on the streets. Due to mass immigration from the former Soviet Union and Ethiopia (some 130,000 Ethiopian Jews live in Israel),^{[347][348]} Russian and Amharic are widely spoken.^[349] More than one million Russian-speaking immigrants arrived in Israel from the post-Soviet states between 1990 and 2004.^[350] French is spoken by around 700,000 Israelis,^[351] mostly originating from France and North Africa (see Maghrebi Jews). English was an official language during the Mandate period; it lost this status after the establishment of Israel, but retains a role comparable to that of an official language,^{[352][353][354]} as may be seen in road signs and official documents. Many Israelis communicate reasonably well in English, as many television programs are broadcast in English with subtitles and the language is taught from the early grades in elementary school. In addition, Israeli universities offer courses in the English language on various subjects.^[355]

Road sign in Hebrew, Arabic, and English

Religion

Religion in Israel

Jewish • Muslim • Christian • Druze • Other.
 Until 1995, figures for Christians also included Others.^[356]

Israel comprises a major part of the Holy Land, a region of significant importance to all Abrahamic religions – Judaism, Christianity, Islam, Druze and Bahá'í Faith.

The religious affiliation of Israeli Jews varies widely: a social survey from 2016 made by Pew Research indicates that 49% self-identify as Hiloni (secular), 29% as Masorti (traditional), 13% as Dati (religious) and 9% as Haredi (ultra-Orthodox).^[357] Haredi Jews are expected to represent more than 20% of Israel's Jewish population by 2028.^[358]

Muslims constitute Israel's largest religious minority, making up about 17.6% of the population. About 2% of the population is Christian and 1.6% is Druze.^[21] The Christian population primarily comprises Arab Christians, but also includes post-Soviet immigrants, the foreign laborers of multinational origins, and followers of Messianic Judaism, considered by most Christians and Jews to be a form of Christianity.^[359] Members of many other religious groups, including Buddhists and Hindus, maintain a presence in Israel, albeit in small numbers.^[360] Out of more than one million immigrants from the former Soviet Union, about 300,000 are considered not Jewish by the Chief Rabbinate of Israel.^[361]

The city of Jerusalem is of special importance to Jews, Muslims, and Christians, as it is the home of sites that are pivotal to their religious beliefs, such as the Old City that incorporates the Western Wall and the Temple Mount, the Al-Aqsa Mosque and the Church of the Holy Sepulchre.^[362] Other locations of religious importance in Israel are Nazareth (holy in Christianity as the site of the Annunciation of Mary), Tiberias and Safed (two of the Four Holy Cities in Judaism), the White Mosque in Ramla (holy in Islam as the shrine of the prophet Saleh), and the Church of Saint George in Lod (holy in Christianity and Islam as the tomb of Saint George or Al Khidr). A number of other religious landmarks are located in the West Bank, among them Joseph's Tomb in Nablus, the birthplace of Jesus and Rachel's Tomb in Bethlehem, and the Cave of the Patriarchs in Hebron. The administrative center of the Bahá'í Faith and the Shrine of the Báb are located at the Bahá'í World Centre in Haifa; the leader of the faith is buried in Acre.^{[363][364][365]} A few kilometres south of the Bahá'í World Centre is Mahmood Mosque affiliated with the reformist Ahmadiyya movement. Kababir, Haifa's mixed neighbourhood of Jews and Ahmadi Arabs is one of a few of its kind in the country, others being Jaffa, Acre, other Haifa neighborhoods, Harish and Upper Nazareth.^{[366][367]}

The Dome of the Rock and the Western Wall, Jerusalem.

Education

Education is highly valued in the Israeli culture and was viewed as a fundamental block of ancient Israelites.^[368] Jewish communities in the Levant were the first to introduce compulsory education for which the organized community, not less than the parents was responsible.^[369] Many international business leaders such as Microsoft founder Bill Gates have praised Israel for its high quality of education in helping spur Israel's economic development and technological boom.^{[370][371][372]} In 2015, the country ranked third among OECD members (after Canada and Japan) for the percentage of 25–64 year-olds that have attained tertiary education with 49% compared with the OECD average of 35%.^[64] In 2012, the country ranked third in the world in the number of academic degrees per capita (20 percent of the population).^{[373][374]}

Multidisciplinary Brain Research Center at Bar-Ilan University

Israel has a school life expectancy of 16 years and a literacy rate of 97.8%.^[21] The State Education Law, passed in 1953, established five types of schools: state secular, state religious, ultra orthodox, communal settlement schools, and Arab schools. The public secular is the largest school group, and is attended by the majority of Jewish and non-Arab pupils in Israel. Most Arabs send their children to schools where Arabic is the language of instruction.^[375] Education is compulsory in Israel for children between the ages of three and eighteen.^{[376][377]} Schooling is divided into three tiers – primary school (grades 1–6), middle school (grades 7–9), and high school (grades 10–12) – culminating with *Bagrut* matriculation exams. Proficiency in core subjects such as mathematics, the Hebrew language, Hebrew and general literature, the English language, history, Biblical scripture and civics is necessary to receive a Bagrut certificate.^[378] Israel's Jewish population maintains a relatively high level of educational attainment where just under half of all Israeli Jews (46%) hold post-secondary degrees. This figure has remained stable in their already high levels of educational attainment over recent generations.^{[379][380]} Israeli Jews (among those ages 25 and older) have average of 11.6 years of schooling making them one of the most highly educated of all major religious groups in the world.^{[381][382]} In Arab, Christian and Druze schools, the exam on Biblical studies is replaced by an exam on Muslim, Christian or Druze heritage.^[383] *Maariv* described the Christian Arabs sectors as "the most successful in education system",^[384] since Christians fared the best in terms of education in comparison to any other religion in Israel.^[385] Israeli children from Russian-speaking families have a higher bagrut pass rate at high-school level.^[386] Amongst immigrant children born in the Former Soviet Union, the bagrut pass rate is higher amongst those families from European FSU states at 62.6% and lower amongst those from Central Asian and Caucasian FSU states.^[387] In 2014, 61.5% of all Israeli twelfth graders earned a matriculation certificate.^[388]

Israel has a tradition of higher education where its quality university education has been largely responsible in spurring the nations modern economic development.^[389] Israel has nine public universities that are subsidized by the state and 49 private colleges.^{[378][390][391]} The Hebrew University of Jerusalem, Israel's second-oldest university after the Technion,^{[392][393]} houses the National Library of Israel, the world's largest repository of Judaica and Hebraica.^[394] The Technion and the Hebrew University consistently ranked among world's 100 top universities by the prestigious ARWU academic ranking.^[395] Other major universities in the country include the Weizmann Institute of Science, Tel Aviv University, Ben-Gurion University of the Negev, Bar-Ilan University, the University of Haifa and the Open University of Israel. Ariel University, in the West Bank, is the newest university institution, upgraded from college status, and the first in over thirty years.

Mount Scopus Campus of the Hebrew University of Jerusalem

Government and politics

Israel is a parliamentary democracy with universal suffrage. A member of parliament supported by a parliamentary majority becomes the prime minister—usually this is the chair of the largest party. The prime minister is the head of government and head of the cabinet.^{[396][397]}

Israel is governed by a 120-member parliament, known as the Knesset. Membership of the Knesset is based on proportional representation of political parties,^[398] with a 3.25% electoral threshold, which in practice has resulted in coalition governments. Residents of Israeli settlements in the West Bank are eligible to vote^[399] and after the 2015 election, 10 of the 120 MKs (8%) were settlers.^[400] Parliamentary elections are scheduled every four years, but unstable coalitions or a no-confidence vote by the Knesset can dissolve a government earlier.

The Basic Laws of Israel function as an uncodified constitution. In 2003, the Knesset began to draft an official constitution based on these laws.^{[21][401]}

The president of Israel is head of state, with limited and largely ceremonial duties.^[396]

Israel has no official religion,^{[402][403][404]} but the definition of the state as "Jewish and democratic" creates a strong connection with Judaism, as well as a conflict between state law and religious law. Interaction between the political parties keeps the balance between state and religion largely as it existed during the British Mandate.^[405]

On 19 July 2018, the Israeli Parliament passed a Basic Law that characterizes the State of Israel as principally a "Nation State of the Jewish People," and Hebrew as its official language. The bill ascribes "special status" to the Arabic language. The same bill gives Jews a unique right to national self-determination, and views the developing of Jewish settlement in the country as "a national interest," empowering the government to "take steps to encourage, advance and implement this interest."^[406]

Legal system

Israel has a three-tier court system. At the lowest level are magistrate courts, situated in most cities across the country. Above them are district courts, serving as both appellate courts and courts of first instance; they are situated in five of Israel's

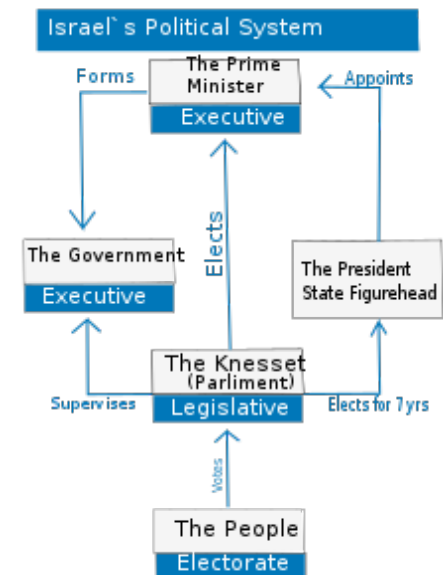

President

Political system of state of Israel

six districts. The third and highest tier is the Supreme Court, located in Jerusalem; it serves a dual role as the highest court of appeals and the High Court of Justice. In the latter role, the Supreme Court rules as a court of first instance, allowing individuals, both citizens and non-citizens, to petition against the decisions of state authorities.^{[407][408]} Although Israel supports the goals of the International Criminal Court, it has not ratified the Rome Statute, citing concerns about the ability of the court to remain free from political impartiality.^[409]

Supreme Court of Israel, Givat Ram, Jerusalem

Israel's legal system combines three legal traditions: English common law, civil law, and Jewish law.^[21] It is based on the principle of *stare decisis* (precedent) and is an adversarial system, where the parties in the suit bring evidence before the court. Court cases are decided by professional judges rather than juries.^[407] Marriage and divorce are under the jurisdiction of the religious courts: Jewish, Muslim, Druze, and Christian. The election of judges is carried out by a committee of two Knesset members, three Supreme Court justices, two Israeli Bar members and two ministers (one of which, Israel's justice minister, is the committee's chairman). The committee's members of the Knesset are secretly elected by the Knesset, and one of them is traditionally a member of the opposition, the committee's Supreme Court justices are chosen by tradition from all Supreme Court justices by seniority, the Israeli Bar members are elected by the bar, and the second minister is appointed by the Israeli cabinet. The current justice minister and committee's chairwoman is Ayelet Shaked.^{[410][411][412]} Administration of Israel's courts (both the "General" courts and the Labor Courts) is carried by the Administration of Courts, situated in Jerusalem. Both General and Labor courts are paperless courts: the storage of court files, as well as court decisions, are conducted electronically. Israel's Basic Law: Human Dignity and Liberty seeks to defend human rights and liberties in Israel. As a result of "Enclave law", large portions of Israeli civil law are applied to Israeli settlements and Israeli residents in the occupied territories.^[413]

Administrative divisions

The State of Israel is divided into six main administrative districts, known as *mehozot* (Hebrew: מחוזות; singular: *mahoz*) – Center, Haifa, Jerusalem, North, South, and Tel Aviv districts, as well as the Judea and Samaria Area in the West Bank. All of the Judea and Samaria Area and parts of the Jerusalem and Northern districts are not recognized internationally as part of Israel. Districts are further divided into fifteen sub-districts known as *nafot* (Hebrew: נפות; singular: *nafa*), which are themselves partitioned into fifty natural regions.^[414]

<u>Golan Heights</u>			<u>United States</u>	<u>Syria</u>	<u>All UN member states except the United States</u>
<u>Israel (proper)</u>			<u>163 UN member states</u>	<u>Israel</u>	<u>163 UN member states</u>

In 1967, as a result of the Six-Day War, Israel captured and occupied the West Bank, including East Jerusalem, the Gaza Strip and the Golan Heights. Israel also captured the Sinai Peninsula, but returned it to Egypt as part of the 1979 Egypt–Israel Peace Treaty.^[415] Between 1982 and 2000, Israel occupied part of southern Lebanon, in what was known as the Security Belt. Since Israel's capture of these territories, Israeli settlements and military installations have been built within each of them, except Lebanon.

The Golan Heights and East Jerusalem have been fully incorporated into Israel under Israeli law, but not under international law. Israel has applied civilian law to both areas and granted their inhabitants permanent residency status and the ability to apply for citizenship. The UN

Security Council has declared the annexation of the Golan Heights and East Jerusalem to be "null and void" and continues to view the territories as occupied.^{[416][417]} The status of East Jerusalem in any future peace settlement has at times been a difficult issue in negotiations between Israeli governments and representatives of the Palestinians, as Israel views it as its sovereign territory, as well as part of its capital.

The West Bank excluding East Jerusalem is known in Israeli law as the Judea and Samaria Area; the almost 400,000 Israeli settlers residing in the area are considered part of Israel's population, have Knesset representation, a large part of Israel's civil and criminal laws applied to them, and their output is considered part of Israel's economy.^{[418][fn 3]} The land itself is not considered part of Israel under Israeli law, as Israel has consciously refrained from annexing the territory, without ever relinquishing its legal claim to the land or defining a border with the area.^[418] There is no border between Israel-proper and the West Bank for Israeli vehicles. Israeli political opposition to annexation is primarily due to the perceived "demographic threat" of incorporating the West Bank's Palestinian population into Israel.^[418] Outside of the Israeli settlements, the West Bank remains under direct Israeli military rule, and Palestinians in the area cannot become Israeli citizens. The international community maintains that Israel does not have sovereignty in the West Bank, and considers Israel's control of the area to be the longest military occupation in modern history.^[54] The West Bank was occupied and annexed by Jordan in 1950, following the Arab rejection of the UN decision to create two states in Palestine. Only Britain recognized this annexation and Jordan has since ceded its claim to the territory to the PLO. The population are mainly Palestinians, including refugees of the 1948 Arab–Israeli War.^[419] From their occupation in 1967 until 1993, the Palestinians living in these territories were under Israeli military administration. Since the Israel–PLO letters of recognition, most of the Palestinian population and cities have been under the internal jurisdiction of the Palestinian Authority, and only partial Israeli military control, although Israel has on several occasions redeployed its troops and reinstated full military administration during periods of unrest. In response to increasing attacks during the Second Intifada, the Israeli government started to construct the Israeli West Bank barrier.^[420] When completed, approximately 13% of the barrier will be constructed on the Green Line or in Israel with 87% inside the West Bank.^{[421][422]}

Israeli West Bank barrier separating Israel and the West Bank

The Gaza Strip is considered to be a "foreign territory" under Israeli law; however, since Israel operates a land, air, and sea blockade of the Gaza Strip, together with Egypt, the international community considers Israel to be the occupying power. The Gaza Strip was occupied by Egypt from 1948 to 1967 and then by Israel after 1967. In 2005, as part of Israel's unilateral disengagement plan, Israel removed all of its settlers and forces from the territory, however, it continues to maintain control of its airspace and waters. The international community, including numerous international humanitarian organizations and various bodies of the UN, consider Gaza to remain occupied.^{[423][424][425][426][427]} Following the 2007 Battle of Gaza, when Hamas assumed power in the Gaza Strip,^[428] Israel tightened its control of the Gaza crossings along its border, as well as by sea and air, and prevented persons from entering and

Area C of the West Bank, controlled by Israel under Oslo Accords, in blue and red, in December 2011

exiting the area except for isolated cases it deemed humanitarian.^[428] Gaza has a border with Egypt, and an agreement between Israel, the European Union, and the PA governed how border crossing would take place (it was monitored by European observers).^[429]

The International Court of Justice, principal judicial organ of the UN, asserted, in its 2004 advisory opinion on the legality of the construction of the Israeli West Bank barrier, that the lands captured by Israel in the Six-Day War, including East Jerusalem, are occupied territory.^[430] Most negotiations relating to the territories have been on the basis of UN Security Council Resolution 242, which emphasises "the inadmissibility of the acquisition of territory by war", and calls on Israel to withdraw from occupied territories in return for normalization of relations with Arab states, a principle known as "Land for peace".^{[431][432][433]} According to some observers, Israel has engaged in systematic and widespread violations of human rights in the occupied territories, including the occupation itself^[434] and war crimes against civilians.^{[435][436][437][438]} The allegations

include violations of international humanitarian law^[439] by the UN Human Rights Council,^[440] with local residents having "limited ability to hold governing authorities accountable for such abuses" by the U.S. State Department,^[441] mass arbitrary arrests, torture, unlawful killings, systemic abuses and impunity by Amnesty International and others^{[442][443][444][445][446][447]} and a denial of the right to Palestinian self-determination.^{[448][449][450][451][452]} In response to such allegations, Prime Minister Netanyahu has defended the country's security forces for protecting the innocent from terrorists^[453] and expressed contempt for what he describes as a lack of concern about the human rights violations committed by "criminal killers".^[454] Some observers, such as Israeli officials, scholars,^[455] United States Ambassador to the UN Nikki Haley^{[456][457]} and UN secretary-generals Ban Ki-moon^[458] and Kofi Annan,^[459] also assert that the UN is disproportionately concerned with Israeli misconduct.

Foreign relations

Israel maintains diplomatic relations with 158 countries and has 107 diplomatic missions around the world,^[460] countries with whom they have no diplomatic relations include most Muslim countries.^[461] Only three members of the Arab League have normalized relations with Israel: Egypt and Jordan signed peace treaties in 1979 and 1994, respectively, and Mauritania opted for full diplomatic relations with Israel in 1999. Despite the peace treaty between Israel and Egypt, Israel is still widely considered an enemy country among Egyptians.^[462] Under Israeli law, Lebanon, Syria, Saudi Arabia, Iraq, Iran, Sudan, and Yemen are enemy countries,^[463] and Israeli citizens may not visit them without permission from the Ministry of the Interior.^[464] Iran had diplomatic relations with Israel under the Pahlavi dynasty^[465] but withdrew its recognition of Israel during the Islamic Revolution.^[466] As a result of the 2008–09 Gaza War, Mauritania, Qatar, Bolivia, and Venezuela suspended political and economic ties with Israel.^{[467][468]} China maintains good ties with both Israel and the Arab world.^[469]

The United States and the Soviet Union were the first two countries to recognize the State of Israel, having declared recognition roughly simultaneously.^[470] Diplomatic relations with the Soviet Union were broken in 1967, following the Six-Day War, and renewed in October 1991.^[471] The United States regards Israel as its "most reliable partner in the Middle East,"^[472] based on "common democratic values, religious affinities, and security interests".^[473] The United States has provided \$68 billion in military assistance and \$32 billion in grants to Israel since 1967, under the Foreign Assistance Act (period beginning 1962),^[474] more than any other country for that period until 2003.^{[474][475][476]} The United Kingdom is seen as having a "natural" relationship with Israel on account of the Mandate for Palestine.^[477] Relations between the two countries were also made stronger by former prime minister Tony Blair's efforts for a two state resolution. By 2007, Germany had paid 25 billion euros in reparations to the Israeli state and individual Israeli Holocaust survivors.^[478] Israel is included in the European Union's European Neighbourhood Policy (ENP), which aims at bringing the EU and its neighbours closer.^[479]

U.S. President Donald Trump and Israeli Prime Minister Benjamin Netanyahu during their press conference in the White House, 2017.

Although Turkey and Israel did not establish full diplomatic relations until 1991,^[480] Turkey has cooperated with the Jewish state since its recognition of Israel in 1949. Turkey's ties to the other Muslim-majority nations in the region have at times resulted in pressure from Arab and Muslim states to temper its relationship with Israel.^[481] Relations between Turkey and Israel took a downturn after the 2008–09 Gaza War and Israel's raid of the Gaza flotilla.^[482] Relations between Greece and Israel have improved since 1995 due to the decline of Israeli–Turkish relations.^[483] The two countries have a defense cooperation agreement and in 2010, the Israeli Air Force hosted Greece's Hellenic Air Force in a joint exercise at the Uvda base. The joint Cyprus-Israel oil and gas explorations centered on the Leviathan gas field are an important factor for Greece, given

its strong links with Cyprus.^[484] Cooperation in the world's longest subsea electric power cable, the EuroAsia Interconnector, has strengthened relations between Cyprus and Israel.^[485]

Azerbaijan is one of the few majority Muslim countries to develop bilateral strategic and economic relations with Israel. Azerbaijan supplies Israel with a substantial amount of its oil needs, and Israel has helped modernize the Armed Forces of Azerbaijan. India established full diplomatic ties with Israel in 1992 and has fostered a strong military, technological and cultural partnership with the country since then.^[486] According to an international opinion survey conducted in 2009 on behalf of the Israel Ministry of Foreign Affairs, India is the most pro-

Israel country in the world.^{[487][488]} India is the largest customer of the Israeli military equipment and Israel is the second-largest military partner of India after Russia.^[489] Ethiopia is Israel's main ally in Africa due to common political, religious and security interests.^[490] Israel provides expertise to Ethiopia on irrigation projects and thousands of Ethiopian Jews live in Israel.

Israel has a history of providing emergency aid and humanitarian response teams to disasters across the world.^[491] In 1955 Israel began its foreign aid program in Burma. The program's focus subsequently shifted to Africa.^[492] Israel's humanitarian efforts officially began in 1957, with the establishment of Mashav, the Israel's Agency for International Development Cooperation.^[493] In this early period, whilst Israel's aid represented only a small percentage of total aid to Africa, its program was effective in creating goodwill throughout the continent; however, following the 1967 war relations soured.^[494] Israel's foreign aid program subsequently shifted its focus to Latin America.^[492] Since the late 1970s Israel's foreign aid has gradually decreased. In recent years Israel has tried to reestablish its aid to Africa.^[495] There are additional Israeli humanitarian and emergency response groups that work with the Israel government, including IsraAid, a joint programme run by 14 Israeli organizations and North American Jewish groups,^[496] ZAKA,^[497] The Fast Israeli Rescue and Search Team (FIRST),^[498] Israeli Flying Aid (IFA),^[499] Save a Child's Heart (SACH)^[500] and Latet.^[501] Between 1985 and 2015, Israel sent 24 delegations of IDF search and rescue unit, the Home Front Command, to 22 countries.^[502] Currently Israeli foreign aid ranks low among OECD nations, spending less than 0.1% of its GNI on development assistance. The UN has set a target of 0.7%. In 2015 six nations reached the UN target.^[503] The country ranked 43rd in the 2016 World Giving Index.^[504]

Military

The Israel Defense Forces (IDF) is the sole military wing of the Israeli security forces, and is headed by its Chief of General Staff, the *Ramatkal*, subordinate to the Cabinet. The IDF consist of the army, air force and navy. It was founded during the 1948 Arab–Israeli War by consolidating paramilitary organizations—chiefly the Haganah—that preceded the establishment of the state.^[505] The IDF also draws upon the resources of the Military Intelligence Directorate (*Aman*), which works with Mossad and Shabak.^[506] The Israel Defense Forces have been involved in several major wars and border conflicts in its short history, making it one of the most battle-trained armed forces in the world.^{[507][508]}

Most Israelis are drafted into the military at the age of 18. Men serve two years and eight months and women two years.^[509] Following mandatory service, Israeli men join the reserve forces and usually do up to several weeks of reserve duty every year until their forties. Most women are exempt from reserve duty. Arab citizens of Israel (except the Druze) and those engaged in full-time religious studies are exempt from military service, although the exemption of yeshiva students has been a source of contention in Israeli society for many years.^{[510][511]} An alternative for those who receive exemptions on various grounds is *Sherut Leumi*, or national service, which involves a program of service in hospitals, schools and other social welfare

frameworks.^[512] As a result of its conscription program, the IDF maintains approximately 176,500 active troops and an additional 465,000 reservists, giving Israel one of the world's highest percentage of citizens with military training.^[63]

The nation's military relies heavily on high-tech weapons systems designed and manufactured in Israel as well as some foreign imports. The Arrow missile is one of the world's few operational anti-ballistic missile systems.^[513] The Python air-to-air missile series is often considered one of the most crucial weapons in its military history.^[514] Israel's Spike missile is one of the most widely exported anti-tank guided missiles (ATGMs) in the world.^[515] Israel's Iron Dome anti-missile air defense system gained worldwide acclaim after intercepting hundreds of Qassam, 122 mm Grad and Fajr-5 artillery rockets fire by Palestinian militants from the Gaza Strip.^{[516][517]} Since the Yom Kippur War, Israel has developed a network of reconnaissance satellites.^[518] The success of the Ofeq program has made Israel one of seven countries capable of launching such satellites.^[519]

Israel is widely believed to possess nuclear weapons^[520] as well as chemical and biological weapons of mass destruction.^[521] Israel has not signed the Treaty on the Non-Proliferation of Nuclear Weapons^[522] and maintains a policy of deliberate ambiguity toward its nuclear capabilities.^[523] The Israeli Navy's Dolphin submarines are believed to be armed with nuclear Popeye Turbo missiles, offering second-strike capability.^[524] Since the Gulf War in 1991, when Israel was attacked by Iraqi Scud missiles, all homes in Israel are required to have a reinforced security room, Merkhav Mugan, impermeable to chemical and biological substances.^[525]

Since Israel's establishment, military expenditure constituted a significant portion of the country's gross domestic product, with peak of 30.3% of GDP spent on defense in 1975.^[526] In 2016, Israel ranked 6th in the world by defense spending as a percentage of GDP, with 5.7%,^[527] and 15th by total military expenditure, with \$18 billion.^[528] Since 1974, the United States has been a particularly notable contributor of military aid to Israel.^[529] Under a memorandum of understanding signed in 2016, the U.S. is expected to provide the country with \$3.8 billion per year, or around 20% of Israel's defense budget, from 2018 to 2028.^[530] Israel ranked 5th globally for arms exports in 2017.^[531] The majority of Israel's arms exports are unreported for security reasons.^[532] Israel is consistently rated low in the Global Peace Index, ranking 144th out of 163 nations for peacefulness in 2017.^[533]

Economy

Iron Dome is the world's first operational anti-artillery rocket defense system.

The Diamond Exchange District in Ramat Gan

Israel is considered the most advanced country in Southwest Asia and the Middle East in economic and industrial development.^{[534][535]} Israel's quality university education and the establishment of a highly motivated and educated populace is largely responsible for spurring the country's high technology boom and rapid economic development.^[370] In 2010, it joined the OECD.^{[61][536]} The country is ranked 16th in the World Economic Forum's *Global Competitiveness Report*^[537] and 54th on the World Bank's *Ease of Doing Business* index.^[538] Israel was also ranked 5th in the world by share of people in high-skilled employment.^[539] Israeli economic data covers the

economic territory of Israel, including the Golan Heights, East Jerusalem and Israeli settlements in the West Bank.^[15]

Despite limited natural resources, intensive development of the agricultural and industrial sectors over the past decades has made Israel largely self-sufficient in food production, apart from grains and beef. Imports to Israel, totaling \$66.76 billion in 2017, include raw materials, military equipment, investment goods, rough diamonds, fuels, grain, and consumer goods.^[21] Leading exports include machinery and equipment, software, cut diamonds, agricultural products, chemicals, and textiles and apparel; in 2017, Israeli exports reached \$60.6 billion.^[21] The Bank of Israel holds \$113 billion of foreign-exchange reserves.^[21] Since the 1970s, Israel has received military aid from the United States, as well as economic assistance in the form of loan guarantees, which now account for roughly half of Israel's external debt. Israel has one of the lowest external debts in the developed world, and is a lender in terms of net external debt (assets vs. liabilities abroad), which in 2015 stood at a surplus of \$69 billion.^[541]

Israel has the second-largest number of startup companies in the world after the United States,^[542] and the third-largest number of NASDAQ-listed companies after the U.S. and China.^[543] Intel^[544] and Microsoft^[545] built their first overseas research and development facilities in Israel, and other high-tech multi-national corporations, such as IBM, Google, Apple, Hewlett-Packard, Cisco Systems, Facebook and Motorola have opened research and development centres in the country. In 2007, American investor Warren Buffett's holding company Berkshire Hathaway bought an Israeli company, Iscar, its first acquisition outside the United States, for \$4 billion.^[546]

Days of working time in Israel are Sunday through Thursday (for a five-day workweek), or Friday (for a six-day workweek). In observance of *Shabbat*, in places where Friday is a work day and the majority of population is Jewish, Friday is a "short day", usually lasting until 14:00 in

Tel Aviv Stock Exchange. Its building is optimized for computer trading, with systems located in an underground bunker to keep the exchange active during emergencies.^[540]

the winter, or 16:00 in the summer. Several proposals have been raised to adjust the work week with the majority of the world, and make Sunday a non-working day, while extending working time of other days or replacing Friday with Sunday as a work day.^[547]

Science and technology

Israel's development of cutting-edge technologies in software, communications and the life sciences have evoked comparisons with Silicon Valley.^{[548][549]} Israel ranks 5th in the 2019 Bloomberg Innovation Index,^[68] and is 1st in the world in expenditure on research and development as a percentage of GDP.^[65] Israel boasts 140 scientists, technicians, and engineers per 10,000 employees, the highest number in the world (in comparison, the same is 85 for the U.S.).^{[550][551][552]} Israel has produced six Nobel Prize-winning scientists since 2004^[553] and has been frequently ranked as one of the countries with the highest ratios of scientific papers per capita in the world.^{[554][555][556]} Israel has led the world in stem-cell research papers per capita since 2000.^[557] Israeli universities are ranked among the top 50 world universities in computer science (Technion and Tel Aviv University), mathematics (Hebrew University of Jerusalem) and chemistry (Weizmann Institute of Science).^[395]

Matam high-tech park in Haifa

In 2012, Israel was ranked ninth in the world by the Futron's Space Competitiveness Index.^[558] The Israel Space Agency coordinates all Israeli space research programs with scientific and commercial goals, and have indigenously designed and built at least 13 commercial, research and spy satellites.^[559] Some of Israel's satellites are ranked among the world's most advanced space systems.^[560] Shavit is a space launch vehicle produced by Israel to launch small satellites into low Earth orbit.^[561] It was first launched in 1988, making Israel the eighth nation to have a space launch capability. In 2003, Ilan Ramon became Israel's first astronaut, serving as payload specialist of STS-107, the fatal mission of the Space Shuttle *Columbia*.^[562]

The ongoing shortage of water in the country has spurred innovation in water conservation techniques, and a substantial agricultural modernization, drip irrigation, was invented in Israel. Israel is also at the technological forefront of desalination and water recycling. The Sorek desalination plant is the largest seawater reverse osmosis (SWRO) desalination facility in the world.^[563] By 2014, Israel's desalination programs provided roughly 35% of Israel's drinking water and it is expected to supply 40% by 2015 and 70% by 2050.^[564] As of 2015, more than 50 percent of the water for Israeli households, agriculture and industry is artificially produced.^[565] The country hosts an annual Water Technology and Environmental Control Exhibition & Conference (WATEC) that attracts thousands of people from across the world.^{[566][567]} In 2011, Israel's water technology industry was worth around \$2 billion a year with annual exports of products and services in the tens of millions of dollars. As a result of innovations in reverse osmosis technology, Israel is set to become a net exporter of water in the coming years.^[568]

Israel has embraced solar energy; its engineers are on the cutting edge of solar energy technology^[570] and its solar companies work on projects around the world.^{[571][572]} Over 90% of Israeli homes use solar energy for hot water, the highest per capita in the world.^{[314][573]} According to government figures, the country saves 8% of its electricity consumption per year because of its solar energy use in heating.^[574] The high annual incident solar irradiance at its geographic latitude creates ideal conditions for what is an internationally renowned solar research and development industry in the Negev Desert.^{[570][571][572]} Israel had a modern electric car infrastructure involving a countrywide network of charging stations to facilitate the charging and exchange of car batteries. It was thought that this would have lowered Israel's oil dependency and lowered the fuel costs of hundreds of Israel's motorists that use cars powered only by electric batteries.^{[575][576][577]} The Israeli model was being studied by several countries and being implemented in Denmark and Australia.^[578] However, Israel's trailblazing electric car company Better Place shut down in 2013.^[579]

The world's largest solar parabolic dish at the Ben-Gurion National Solar Energy Center.^[569]

Transportation

Israel has 19,224 kilometres (11,945 mi) of paved roads,^[580] and 3 million motor vehicles.^[581] The number of motor vehicles per 1,000 persons is 365, relatively low with respect to developed countries.^[581] Israel has 5,715 buses on scheduled routes,^[582] operated by several carriers, the largest of which is Egged, serving most of the country. Railways stretch across 1,277 kilometres (793 mi) and are operated solely by government-owned Israel Railways.^[583] Following major investments beginning in the early to mid-1990s, the number of train passengers per year has grown from 2.5 million in 1990, to 53 million in 2015; railways are also transporting 7.5 million tons of cargo, per year.^[583]

Ben Gurion International Airport

Israel is served by two international airports, Ben Gurion Airport, the country's main hub for international air travel near Tel Aviv, and Ramon Airport, which serves the southernmost port city of Eilat. There are several small domestic airports as well.^[584] Ben Gurion, Israel's largest airport, handled over 15 million passengers in 2015.^[585] On the Mediterranean coast, the Port of Haifa is the country's oldest and largest port, while Ashdod Port is one of the few deep water ports in the world built on the open sea.^[584] In addition to these, the smaller Port of Eilat is situated on the Red Sea, and is used mainly for trading with Far East countries.^[584]

Tourism

Tourism, especially religious tourism, is an important industry in Israel, with the country's temperate climate, beaches, archaeological, other historical and biblical sites, and unique geography also drawing tourists. Israel's security problems have taken their toll on the industry, but the number of incoming tourists is on the rebound.^[586] In 2017, a record of 3.6 million tourists visited Israel, yielding a 25 percent growth since 2016 and contributed NIS 20 billion to the Israeli economy.^{[587][588][589][590]}

Ein Bokek resort on the shore of the Dead Sea

Energy

Israel began producing natural gas from its own offshore gas fields in 2004. Between 2005 and 2012, Israel had imported gas from Egypt via the al-Arish–Ashkelon pipeline, which was terminated due to Egyptian Crisis of 2011–14. In 2009, a natural gas reserve, Tamar, was found near the coast of Israel. A second natural gas reserve, Leviathan, was discovered in 2010.^[591] The natural gas reserves in these two fields (Leviathan has around 19 trillion cubic feet) could make Israel energy secure for more than 50 years. In 2013, Israel began commercial production of natural gas from the Tamar field. As of 2014, Israel produced over 7.5 billion cubic meters (bcm) of natural gas a year.^[592] Israel had 199 billion cubic meters (bcm) of proven reserves of natural gas as of the start of 2016.^[593]

Ketura Sun is Israel's first commercial solar field. Built in early 2011 by the Arava Power Company on Kibbutz Ketura, Ketura Sun covers twenty acres and is expected to produce green energy amounting to 4.95 megawatts (MW). The field consists of 18,500 photovoltaic panels made by Suntech, which will produce about 9 gigawatt-hours (GWh) of electricity per year.^[594] In the next twenty years, the field will spare the production of some 125,000 metric tons of carbon dioxide.^[595] The field was inaugurated on 15 June 2011.^[596] On 22 May 2012 Arava Power Company announced that it had reached financial close on an additional 58.5 MW for 8 projects to be built in the Arava and the Negev valued at 780 million NIS or approximately \$204 million.^[597]

Culture

Israel's diverse culture stems from the diversity of its population. Jews from diaspora communities around the world brought their cultural and religious traditions back with them, creating a melting pot of Jewish customs and beliefs.^[598] Arab influences are present in many cultural spheres,^{[599][600]} such as architecture,^[601] music,^[602] and cuisine.^[603] Israel is the only country in the world where life revolves around the Hebrew calendar. Work and school holidays are determined by the Jewish holidays, and the official day of rest is Saturday, the Jewish Sabbath.^[604]

Literature

Israeli literature is primarily poetry and prose written in Hebrew, as part of the renaissance of Hebrew as a spoken language since the mid-19th century, although a small body of literature is published in other languages, such as English. By law, two copies of all printed matter published in Israel must be deposited in the National Library of Israel at the Hebrew University of Jerusalem. In 2001, the law was amended to include audio and video recordings, and other non-print media.^[605] In 2016, 89 percent of the 7,300 books transferred to the library were in Hebrew.^[606]

In 1966, Shmuel Yosef Agnon shared the Nobel Prize in Literature with German Jewish author Nelly Sachs.^[607] Leading Israeli poets have been Yehuda Amichai, Nathan Alterman, Leah Goldberg, and Rachel Bluwstein. Internationally famous contemporary Israeli novelists include Amos Oz, Etgar Keret and David Grossman. The Israeli-Arab satirist Sayed Kashua (who writes in Hebrew) is also internationally known. Israel has also been the home of Emile Habibi, whose novel *The Secret Life of Saeed: The Pessoptimist*, and other writings, won him the Israel prize for Arabic literature.^{[608][609]}

Shmuel Yosef Agnon,
laureate of the Nobel Prize
in Literature

Music and dance

Israeli music contains musical influences from all over the world; Mizrahi and Sephardic music, Hasidic melodies, Greek music, jazz, and pop rock are all part of the music scene.^{[610][611]} Among Israel's world-renowned^{[612][613]} orchestras is the Israel Philharmonic Orchestra, which has been in operation for over seventy years and today performs more than two hundred concerts each year.^[614] Itzhak Perlman, Pinchas Zukerman and Ofra Haza are among the internationally acclaimed musicians born in Israel. Israel has participated in the Eurovision Song Contest nearly every year since 1973, winning the competition four times and hosting it twice.^{[615][616]} Eilat has hosted its own international music festival, the Red Sea Jazz Festival, every summer since 1987.^[617] The nation's canonical folk songs, known as "Songs of the Land of Israel," deal with the experiences of the pioneers in building the Jewish homeland.^[618]

Israel Philharmonic Orchestra
conducted by Zubin Mehta

Cinema and theatre

Ten Israeli films have been final nominees for Best Foreign Language Film at the Academy Awards since the establishment of Israel. The 2009 movie *Ajami* was the third consecutive nomination of an Israeli film.^[619] Palestinian Israeli filmmakers have made a number of films dealing with the Arab-Israeli conflict and the status of Palestinians within Israel, such as Mohammed Bakri's 2002 film *Jenin, Jenin* and *The Syrian Bride*.

Continuing the strong theatrical traditions of the Yiddish theatre in Eastern Europe, Israel maintains a vibrant theatre scene. Founded in 1918, Habima Theatre in Tel Aviv is Israel's oldest repertory theater company and national theater.^[620]

Media

The 2017 *Freedom of the Press* annual report by Freedom House ranked Israel as the Middle East and North Africa's most free country, and 64th globally.^[621] In the 2017 Press Freedom Index by Reporters Without Borders, Israel (including "Israel extraterritorial" since 2013 ranking)^[622] was placed 91st of 180 countries, first in the Middle East and North Africa region.^[623]

Museums

The Israel Museum in Jerusalem is one of Israel's most important cultural institutions^[624] and houses the Dead Sea Scrolls,^[625] along with an extensive collection of Judaica and European art.^[624] Israel's national Holocaust museum, Yad Vashem, is the world central archive of Holocaust-related information.^[626] Beit Hatfutsot ("The Diaspora House"), on the campus of Tel Aviv University, is an interactive museum devoted to the history of Jewish communities around the world.^[627] Apart from the major museums in large cities, there are high-quality art spaces in many towns and kibbutzim. Mishkan LeOmanut in kibbutz Ein Harod Meuhad is the largest art museum in the north of the country.^[628]

Shrine of the Book, repository of the Dead Sea Scrolls in Jerusalem

Israel has the highest number of museums per capita in the world.^[629] Several Israeli museums are devoted to Islamic culture, including the Rockefeller Museum and the L. A. Mayer Institute for Islamic Art, both in Jerusalem. The Rockefeller specializes in archaeological remains from the Ottoman and other periods of Middle East history. It is also the home of the first hominid fossil skull found in Western Asia, called Galilee Man.^[630] A cast of the skull is on display at the Israel Museum.^[631]

Cuisine

Israeli cuisine includes local dishes as well as Jewish cuisine brought to the country by immigrants from the diaspora. Since the establishment of the state in 1948, and particularly since the late 1970s, an Israeli fusion cuisine has developed.^[632] Israeli cuisine has adopted, and continues to adapt, elements of the Mizrahi, Sephardi, and Ashkenazi styles of cooking. It incorporates many foods traditionally eaten in the Levantine, Arab, Middle Eastern and Mediterranean cuisines, such as falafel, hummus, shakshouka, couscous, and za'atar. Schnitzel, pizza, hamburgers, French fries, rice and salad are also common in Israel.

Roughly half of the Israeli-Jewish population attests to keeping kosher at home.^{[633][634]} Kosher restaurants, though rare in the 1960s, make up around 25% of the total as of 2015, perhaps reflecting the largely secular values of those who dine out.^[632] Hotel restaurants are much more likely to serve kosher food.^[632] The non-kosher retail market was traditionally sparse, but grew rapidly and considerably following the influx of immigrants from the post-Soviet states during the 1990s.^[635] Together with non-kosher fish, rabbits and ostriches, pork—often called "white meat" in Israel^[635]—is produced and consumed, though it is forbidden by both Judaism and Islam.^[636]

A meal including falafel, hummus, French fries and Israeli salad

Sports

The most popular spectator sports in Israel are association football and basketball.^[637] The Israeli Premier League is the country's premier football league, and the Israeli Basketball Premier League is the premier basketball league.^[638] Maccabi Haifa, Maccabi Tel Aviv, Hapoel Tel Aviv and Beitar Jerusalem are the largest football clubs. Maccabi Tel Aviv, Maccabi Haifa and Hapoel Tel Aviv have competed in the UEFA Champions League and Hapoel Tel Aviv reached the UEFA Cup quarter-finals. Israel hosted and won the 1964 AFC Asian Cup; in 1970 the Israel national football team qualified for the FIFA World Cup, the only time it participated in the World Cup. The 1974 Asian Games, held in Tehran, were the last Asian Games in which Israel participated, plagued by the Arab countries that refused to compete with Israel. Israel was excluded from the 1978 Asian Games and since then has not competed in Asian sport events.^[639] In 1994, UEFA agreed to admit Israel, and its football teams now compete in Europe. Maccabi Tel Aviv B.C. has won the European championship in basketball six times.^[640] In 2016, the country was chosen as a host for the EuroBasket 2017.

Teddy Stadium of Jerusalem

Chess is a leading sport in Israel and is enjoyed by people of all ages. There are many Israeli grandmasters and Israeli chess players have won a number of youth world championships.^[641] Israel stages an annual international championship and hosted the World Team Chess Championship in 2005. The Ministry of Education and the World Chess Federation agreed upon a project of teaching chess within Israeli schools, and it has been introduced into the curriculum of some schools.^[642] The city of Beersheba has become a national chess center, with the game being taught in the city's kindergartens. Owing partly to Soviet immigration, it is home to the largest number of chess grandmasters of any city in the world.^{[643][644]} The Israeli chess team won the silver medal at the 2008 Chess

Boris Gelfand, chess Grandmaster

Olympiad^[645] and the bronze, coming in third among 148 teams, at the 2010 Olympiad. Israeli grandmaster Boris Gelfand won the Chess World Cup 2009^[646] and the 2011 Candidates Tournament for the right to challenge the world champion. He only lost the World Chess Championship 2012 to reigning world champion Anand after a speed-chess tie breaker.

Israel has won nine Olympic medals since its first win in 1992, including a gold medal in windsurfing at the 2004 Summer Olympics.^[647] Israel has won over 100 gold medals in the Paralympic Games and is ranked 20th in the all-time medal count. The 1968 Summer Paralympics were hosted by Israel.^[648] The Maccabiah Games, an Olympic-style event for Jewish and Israeli athletes, was inaugurated in the 1930s, and has been held every four years since then. Israeli tennis champion Shahar Pe'er ranked 11th in the world on 31 January 2011.^[649] Krav Maga, a martial art developed by Jewish ghetto defenders during the struggle against fascism in Europe, is used by the Israeli security forces and police. Its effectiveness and practical approach to self-defense, have won it widespread admiration and adherence around the world.^[650]

Notes

1. Recognition by other UN member states: Australia (West Jerusalem),^[1] Russia (West Jerusalem),^[2] the Czech Republic (West Jerusalem),^[3] Honduras,^[4] Guatemala,^[5] Nauru,^[6] and the United States.^[7]
2. Arabic previously had been an official language of the State of Israel.^[8] In 2018 its classification was changed to a 'special status in the state' with its use by state institutions to be set in law.^{[9][10][11]}
3. Israeli population and economic data covers the economic territory of Israel, including the Golan Heights, East Jerusalem and Israeli settlements in the West Bank.^{[15][16]}
4. The Jerusalem Law states that "Jerusalem, complete and united, is the capital of Israel" and the city serves as the seat of the government, home to the President's residence, government offices, supreme court, and parliament. United Nations Security Council Resolution 478 (20 August 1980; 14–0, U.S. abstaining) declared the Jerusalem Law "null and void" and called on member states to withdraw their diplomatic missions from Jerusalem (see Kellerman 1993, p. 140). See Status of Jerusalem for more information.
5. The majority of the international community (including the UN General Assembly, the United Nations Security Council, the European Union, the International Criminal Court, and the vast majority of human rights organizations) considers Israel to be occupying Gaza, the West Bank and East Jerusalem. Gaza is still considered to be "occupied" by the United Nations, international human rights organisations, and the majority of governments and legal commentators, despite the 2005 Israeli disengagement from Gaza, due to various forms of ongoing military and economic control.^[53]
The government of Israel and some supporters have, at times, disputed this position of the

international community. For more details of this terminology dispute, including with respect to the current status of the Gaza Strip, see [International views on the Israeli-occupied territories](#) and [Status of territories captured by Israel](#).

For an explanation of the differences between an annexed but disputed territory (e.g., [Tibet](#)) and a militarily occupied territory, please see the article [Military occupation](#).

- †1. **Morris 2008**, p. 66: at 1946 "The League demanded independence for Palestine as a "unitary" state, with an Arab majority and minority rights for the Jews.", p. 67: at 1947 "The League's Political Committee met in Sofar, Lebanon, on 16–19 September, and urged the Palestine Arabs to fight partition, which it called "aggression," "without mercy." The League promised them, in line with Bludan, assistance "in manpower, money and equipment" should the United Nations endorse partition.", p. 72: at December 1947 "The League vowed, in very general language, "to try to stymie the partition plan and prevent the establishment of a Jewish state in Palestine.""
- †2. **Morris 2008**, p. 75: "The night of 29–30 November passed in the Yishuv's settlements in noisy public rejoicing. Most had sat glued to their radio sets broadcasting live from Flushing Meadow. A collective cry of joy went up when the two-thirds mark was achieved: a state had been sanctioned by the international community."
- †3. **Morris 2008**, p. 396: "The immediate trigger of the 1948 War was the November 1947 UN partition resolution. The Zionist movement, except for its fringes, accepted the proposal.", "The Arab war aim, in both stages of the hostilities, was, at a minimum, to abort the emergence of a Jewish state or to destroy it at inception. The Arab states hoped to accomplish this by conquering all or large parts of the territory allotted to the Jews by the United Nations. And some Arab leaders spoke of driving the Jews into the sea and ridding Palestine "of the Zionist plague." The struggle, as the Arabs saw it, was about the fate of Palestine/ the Land of Israel, all of it, not over this or that part of the country. But, in public, official Arab spokesmen often said that the aim of the May 1948 invasion was to "save" Palestine or "save the Palestinians," definitions more agreeable to Western ears."

- Sanger, Andrew (2011). M.N. Schmitt; Louise Arimatsu; Tim McCormack (eds.). *The Contemporary Law of Blockade and the Gaza Freedom Flotilla* (<https://books.google.com/books?id=hYiIWWlpFzEC&pg=PAPA429>). *Yearbook of International Humanitarian Law 2010*. Yearbook of International Humanitarian Law. **13**. p. 429. doi:10.1007/978-90-6704-811-8_14 (https://doi.org/10.1007%2F978-90-6704-811-8_14). ISBN 978-90-6704-811-8. "Israel claims it no longer occupies the Gaza Strip, maintaining that it is neither a State nor a territory occupied or controlled by Israel, but rather it has 'sui generis' status. Pursuant to the Disengagement Plan, Israel dismantled all military institutions and settlements in Gaza and there is no longer a permanent Israeli military or civilian presence in the territory. However the Plan also provided that Israel will guard and monitor the external land perimeter of the Gaza Strip, will continue to maintain exclusive authority in Gaza air space, and will continue to exercise security activity in the sea off the coast of the Gaza Strip as well as maintaining an Israeli military presence on the Egyptian-Gaza border. and reserving the right to reenter Gaza at will. Israel continues to control six of Gaza's seven land crossings, its maritime borders and airspace and the movement of goods and persons in and out of the territory. Egypt controls one of Gaza's land crossings. Troops from the Israeli Defence Force regularly enter parts of the territory and/or deploy missile attacks, drones and sonic bombs into Gaza. Israel has declared a no-go buffer zone that stretches deep into Gaza: if Gazans enter this zone they are shot on sight. Gaza is also dependent on Israel for inter alia electricity, currency, telephone networks, issuing IDs, and permits to enter and leave the territory. Israel also has sole control of the Palestinian Population Registry through which the Israeli Army regulates who is classified as a Palestinian and who is a Gazan or West Banker. Since 2000 aside from a limited number of exceptions Israel has refused to add people to the Palestinian Population Registry. It is this direct external control over Gaza and indirect control over life within Gaza that has led the United Nations, the UN General Assembly, the UN Fact Finding Mission to Gaza, International human rights organisations, US Government websites, the UK Foreign and Commonwealth Office and a significant number of legal commentators, to reject the argument that Gaza is no longer occupied."
- Scobbie, Iain (2012). Elizabeth Wilmshurst (ed.). *International Law and the Classification of Conflicts* (<https://books.google.com/books?id=GM90Xp03uuEC&pg=PAPA295>). Oxford University Press. p. 295. ISBN 978-0-19-965775-9. "Even after the accession to power of Hamas, Israel's claim that it no longer occupies Gaza has not been accepted by UN bodies, most States, nor the majority of academic commentators because of its exclusive control of its border with Gaza and crossing points including the effective control it exerted over the Rafah crossing until at least May 2011, its control of Gaza's maritime zones and airspace which constitute what Aronson terms the 'security envelope' around Gaza, as well as its ability to intervene forcibly at will in Gaza."

- Gawerc, Michelle (2012). *Prefiguring Peace: Israeli-Palestinian Peacebuilding Partnerships* (<https://books.google.com/books?id=Hka8FZ4UdWUC&pg=PAPA44>). Lexington Books. p. 44. ISBN 978-0-7391-6610-9. "While Israel withdrew from the immediate territory, Israel still controlled all access to and from Gaza through the border crossings, as well as through the coastline and the airspace. In addition, Gaza was dependent upon Israel for water electricity sewage communication networks and for its trade (Gisha 2007. Dowty 2008). In other words, while Israel maintained that its occupation of Gaza ended with its unilateral disengagement Palestinians – as well as many human right organizations and international bodies – argued that Gaza was by all intents and purposes still occupied."

30. Mark Smith in "The Early History of God: Yahweh and Other Deities of Ancient Israel" states "Despite the long regnant model that the Canaanites and Israelites were people of fundamentally different culture, archaeological data now casts doubt on this view. The material culture of the region exhibits numerous common points between Israelites and Canaanites in the Iron I period (c. 1200–1000 BCE). The record would suggest that the Israelite culture largely overlapped with and derived from Canaanite culture... In short, Israelite culture was largely Canaanite in nature. Given the information available, one cannot maintain a radical cultural separation between Canaanites and Israelites for the Iron I period." (pp. 6–7). In Becking, Bob; Grabbe, Lester (eds.). *Between Evidence and Ideology Essays on the History of Ancient Israel read at the Joint Meeting of the Society for Old Testament Study and the Oud Testamentisch Werkgezelschap Lincoln, July 2009*. Brill. p. 47. ISBN 978-90-04-18737-5. "As a West Semitic personal name it existed long before it became a tribal or a geographical name. This is not without significance, though is it rarely mentioned. We learn of a maryanu named ysr"il (*Yiṣr—ā"ilu) from Ugarit living in the same period, but the name was already used a thousand years before in Ebla. The word Israel originated as a West Semitic personal name. One of the many names that developed into the name of the ancestor of a clan, of a tribe and finally of a people and a nation."

Cambridge University Press. p. 829. ISBN 978-0-521-40437-2. Retrieved 17 May 2015. "Haifa was taken [...] in August 1100 or June 1101, according to Muslim sources which contradict one another. Albert of Aachen does not mention the date in a clear manner either. From what he says, it appears that it was mainly the Jewish inhabitants of the city who defended the fortress of Haifa. In his rather strange Latin style, he mentions that there was a Jewish population in Haifa, and that they fought bravely within the walls of the city. He explains that the Jews there were protected people of the Muslims (the Fatimids). They fought side by side with units of the Fatimid army, striking back at Tancred's army from above the walls of the citadel (... *Judaei civis comixtis Sarracenorum turmis*) until the Crusaders overcame them and they were forced to abandon the walls. The Muslims and the Jews then managed to escape from the fortress with their lives, while the rest of the population fled the city *en masse*. Whoever remained was slaughtered, and huge quantities of spoils were taken. [...] [Note #3: Albert of Aachen (Albericus, Albertus Aquensis), *Historia Hierosolymitanae Expeditionis*, in: *RHC* (Occ.), IV. p. 523; etc.]"

ISBN 978-0-8132-1969-1. "citizens of the Jewish race, who lived in the city by the favour and consent of the king of Egypt in return for payment of tribute, got on the walls bearing arms and put up a very stubborn defence, until the Christians, weighed down by various blows over the period of two weeks, absolutely despaired and held back their hands from any attack. [...] the Jewish citizens, mixed with Saracen troops, at once fought back manfully,... and counter-attacked. [Albert of Aachen, *Historia Ierosolimitana* 7.23, ed. and transl. Susan B. Edgington (Oxford: Clarendon Press, 2007), 516 and 521.]"

ISBN 978-0-8130-1205-6. "the removal of the Egyptian blockade of the Straits of Tiran at the entrance of the Gulf of Aqaba. The blockade closed Israel's sea lane to East Africa and the Far East, hindering the development of Israel's southern port of Eilat and its hinterland, the Nege. Another important objective of the Israeli war plan was the elimination of the terrorist bases in the Gaza Strip, from which daily fedayeen incursions into Israel made life unbearable for its southern population. And last but not least, the concentration of the Egyptian forces in the Sinai Peninsula, armed with the newly acquired weapons from the Soviet bloc, prepared for an attack on Israel. Here, Ben-Gurion believed, was a time bomb that had to be defused before it was too late. Reaching the Suez Canal did not figure at all in Israel's war objectives. "
17. Dominic Joseph Caraccilo (2011). *Beyond Guns and Steel: A War Termination Strategy* (<https://books.google.com/books?id=FDA8dQyaQ9MC&pg=PAPA113>). ABC-CLIO. pp. 113–. ISBN 978-0-313-39149-1. "The escalation continued with the Egyptian blockade of the Straits of Tiran, and Nasser's nationalization of the Suez Canal in July 1956. On October 14, Nasser made clear his intent:"I am not solely fighting against Israel itself. My task is to deliver the Arab world from destruction through Israel's intrigue, which has its roots abroad. Our hatred is very strong. There is no sense in talking about peace with Israel. There is not even the smallest place for negotiations." Less than two weeks later, on October 25, Egypt signed a tripartite agreement with Syria and Jordan placing Nasser in command of all three armies. The continued blockade of the Suez Canal and Gulf of Aqaba to Israeli shipping, combined with the increased fedayeen attacks and the bellicosity of recent Arab statements, prompted Israel, with the backing of Britain and France, to attack Egypt on October 29, 1956."
18. Alan Dowty (2005). *Israel/Palestine* (<https://books.google.com/books?id=9iFqx6NPPgEC&pg=PAPA102>). Polity. pp. 102–. ISBN 978-0-7456-3202-5. "Gamal Abdel Nasser, who declared in one speech that "Egypt has decided to dispatch her heroes, the disciples of Pharaoh and the sons of Islam and they will cleanse the land of Palestine....There will be no peace on Israel's border because we demand vengeance, and vengeance is Israel's death."...The level of violence against Israelis, soldiers and civilians alike, seemed to be rising inexorably."

19. "The Jewish Virtual Library, The Sinai-Suez Campaign: Background & Overview" (https://www.jewishvirtuallibrary.org/jsource/History/Suez_War.html). "In 1955, Egyptian President Gamal Abdel Nasser began to import arms from the Soviet Bloc to build his arsenal for the confrontation with Israel. In the short-term, however, he employed a new tactic to prosecute Egypt's war with Israel. He announced it on August 31, 1955: Egypt has decided to dispatch her heroes, the disciples of Pharaoh and the sons of Islam and they will cleanse the land of Palestine....There will be no peace on Israel's border because we demand vengeance, and vengeance is Israel's death. These "heroes" were Arab terrorists, or fedayeen, trained and equipped by Egyptian Intelligence to engage in hostile action on the border and infiltrate Israel to commit acts of sabotage and murder."

12. Charbit, Denis (2014). "Israel's Self-Restrained Secularism from the 1947 Status Quo Letter to the Present" (<https://books.google.com/books?id=gThvBAAQBAJ&pg=PAPA167>). In Berlinerblau, Jacques; Fainberg, Sarah; Nou, Aurora (eds.). *Secularism on the Edge: Rethinking Church-State Relations in the United States, France, and Israel*. New York: Palgrave Macmillan. pp. 167–169. ISBN 978-1-137-38115-6. "The compromise, therefore, was to choose constructive ambiguity: as surprising as it may seem, there is no law that declares Judaism the official religion of Israel. However, there is no other law that declares Israel's neutrality toward all confessions. Judaism is not recognized as the official religion of the state, and even though the Jewish, Muslim and Christian clergy receive their salaries from the state, this fact does not make Israel a neutral state. This apparent pluralism cannot dissimulate the fact that Israel displays a clear and undoubtedly hierarchical pluralism in religious matters. ... It is important to note that from a multicultural point of view, this self-restrained secularism allows Muslim law to be practiced in Israel for personal matters of the Muslim community. As surprising as it seems, if not paradoxical for a state in war, Israel is the only Western democratic country in which Sharia enjoys such an official status."
13. Sharot, Stephen (2007). "Judaism in Israel: Public Religion, Neo-Traditionalism, Messianism, and Ethno-Religious Conflict" (<https://books.google.com/books?id=vA8edg7bv0kC&pg=PAPA671>). In Beckford, James A.; Demerath, Jay (eds.). *The Sage Handbook of the Sociology of Religion*. London and Thousand Oaks, CA: Sage Publications. pp. 671–672. ISBN 978-1-4129-1195-5. "It is true that Jewish Israelis, and secular Israelis in particular, conceive of religion as shaped by a state-sponsored religious establishment. There is no formal state religion in Israel, but the state gives its official recognition and financial support to particular religious communities, Jewish, Islamic and Christian, whose religious authorities and courts are empowered to deal with matters of personal status and family law, such as marriage, divorce, and alimony, that are binding on all members of the communities."

14. Jacoby, Tami Amanda (2005). *Women in Zones of Conflict: Power and Resistance in Israel* (<https://books.google.com/books?id=pr1LJNrlmulC&pg=PAPA53>). Montreal, Quebec and Kingston, Ontario: McGill-Queen's University Press. pp. 53–54. ISBN 978-0-7735-2993-9. "Although there is no official religion in Israel, there is also no clear separation between religion and state. In Israeli public life, tensions frequently arise among different streams of Judaism: Ultra-Orthodox, National-Religious, *Mesorati* (Conservative), Reconstructionist Progressive (Reform), and varying combinations of traditionalism and non-observance. Despite this variety in religious observances in society, Orthodox Judaism prevails institutionally over the other streams. This boundary is an historical consequence of the unique evolution of the relationship between Israel nationalism and state building. ... Since the founding period, in order to defuse religious tensions, the State of Israel has adopted what is known as the 'status quo,' an unwritten agreement stipulating that no further changes would be made in the status of religion, and that conflict between the observant and non-observant sectors would be handled circumstantially. The 'status quo' has since pertained to the legal status of both religious and secular Jews in Israel. This situation was designed to appease the religious sector, and has been upheld indefinitely through the disproportionate power of religious political parties in all subsequent coalition governments. ... On one hand, the Declaration of Independence adopted in 1948 explicitly guarantees freedom of religion. On the other, it simultaneously prevents the separation of religion and state in Israel."
15. Englard, Izhak (Winter 1987). "Law and Religion in Israel". *The American Journal of Comparative Law*. **35** (1): 185–208. doi:10.2307/840166 (<https://doi.org/10.2307%2F840166>). JSTOR 840166 (<https://www.jstor.org/stable/840166>). "The great political and ideological importance of religion in the state of Israel manifests itself in the manifold legal provisions concerned with religions phenomenon. ... It is not a system of separation between state and religion as practiced in the U.S.A and several other countries of the world. In Israel a number of religious bodies exercise official functions; the religious law is applied in limited areas"

"And even when no Israelis are involved, few countries are as fast as Israel in mobilizing entire delegations to rush to the other side of the world. It has been proved time and again in recent years, after the earthquake in Haiti, the typhoon in the Philippines and the quake/tsunami/nuclear disaster in Japan. For a country of Israel's size and resources, without conveniently located aircraft carriers and overseas bases, it is quite an impressive achievement."

9. Mendel, Yonatan; Ranta, Ronald (2016). *From the Arab Other to the Israeli Self: Palestinian Culture in the Making of Israeli National Identity* (https://books.google.com/books?id=dD_7CwAAQBAJ). Routled. p. 137. ISBN 978-1-317-13171-7. "early settlers found it useful and suitable to imitate, adopt, adapt and later appropriate local customs, traditions, symbols and words. This was the principal process that we have unearthed in the book, and which changed in style, volume and recognition with time and with the shifting political environment in Palestine/Israel, yet was kept in the DNA of what Jewish-Israelis perceive as 'Israeliness'. It was an ongoing love-hate tango with the Arab-Palestinian 'other', which on the one hand represented the opposite of the 'self', and on the other hand, its presence was a mandatory ingredient in the creation of many of the customs, traditions and practices considered as local and as Israeli [...] the line of thinking according to which the Arab-Palestinian influence on Hebrew culture has been dramatically reduced following the creation of Israel as an independent state in 1948, is simply inaccurate and does not reflect the reality of Jewish-Arab-Palestinian relations. Not only were the early relations between settlers and Arab-Palestinians important – we would say essential – to our understanding of modern life in Israel and to Jewish-Israeli identity and culture, but the fascination leading to adaptation of Arab and Arab-Palestinian cultures did not end in 1948, it is in fact an ongoing process [...] many of the customs and traditions, which Jewish-Israelis define as belonging to the Israeli way of life and that represent 'Israeliness', are based on those early relations and cultural appropriations."
10. Mendel, Yonatan; Ranta, Ronald (2016). *From the Arab Other to the Israeli Self: Palestinian Culture in the Making of Israeli National Identity* (https://books.google.com/books?id=dD_7CwAAQBAJ). Routledge. pp. 140–141. ISBN 978-1-317-13171-7. "Jewish-Israeli identity and culture [...] have had a wide range of influences, among these were also Arab and Arab-Palestinian elements. When we looked at them in greater detail through Israeli food, Israeli dance, Israeli music, or Israeli symbols, we found – somewhere in their very root – also an Arab component. This is a unique influence not only because the Arab-Palestinian influence is common in different cultural fields, but because it seems that these influences are the least noted [...] Arab and Arab-Palestinian influence is much more important in understanding Jewish-Israeli identity and culture than given credit or recognised, and that it had an effect – at times basic and at times more profound – on the deferent cultural fields that constitute what Jewish-Israelis perceive as 'Israeliness' and the Israeli way of life. We believe that due to political reasons, the Arab influence on Israeli culture has been underestimated and overlooked [...] presentation of the Jewish and Arab identity and culture as two binaries is misleading. The two identities should be viewed more accurately as a scale with overlapping points, while acknowledging that – despite the conflict and at times because of the conflict – it is hard to admit that at the end of many Hebrew sentences sits an Arab smoking a 'nargilah' and that the Arab-Palestinian 'Other' is actually at the very heart of the Jewish-Israeli 'Self'... Jewish-Israelis and Arab-Palestinians share a number of similarities and points of contact that allow for easier diffusion of culture and symbols. These include, for example the presence of large communities of Jews who have originated in Arab countries and the increasing visibility and involvement of Arab-Palestinians in Israeli politics, economy and society. It is therefore expected that this proximity will result in constant cultural diffusion."
